

# FEEDBACK

## YOUR SUGGESTIONS

### IS EFY FREE?

I noticed that EFY magazine is available for free through Jio Mags Android application by Reliance Jio. I think your digital magazine initiative, e-zine, is totally compromised here. This may cause huge revenue losses to EFY, if the platform is not affiliated with you. I really do not want to see my favourite electronics magazine go bankrupt, so just checking with you.

**Allen Mathew**

Through email

**EFY.** Thank you for raising this issue! Actually, we had allowed a partner of Reliance to publish our magazines on their platform. In return, we were promised certain revenues and data of our readers. But that did not happen. So, we are terminating our agreement with them. Future editions of our publications will not be hosted on this platform. Thanking you once again for the alert!

### RASPBERRY PI 3 BOARD

Raspberry Pi 3 board received against my subscription offer is not working. The power LED light glows when power is switched on, but the USB ports do not work.

**Anil Kumar Chawla**

Through email

**EFY.** Are you using the board without an SD card? To use Raspberry Pi (RPI), you need to install an operating system (OS) on the SD card having at least 8GB memory capacity.

After burning the OS on to the SD card, insert the same into the SD card slot in RPi. Connect the power supply (5V, 2A adaptor) to RPi, and the latter will boot up automatically. Check if the USB ports are still giving problems. If yes, it is likely that RPi board has a manufacturing defect. It can be returned to EFY for replacement.

### Electronics Projects

'Better Utilisation of Radio Spectrum with Cognitive Radio' software article published in October 2017 issue is a good one!

**Prakash Jha**

**EFY.** Thanks for the feedback!

'Automatic Water Re-Filler for Air-Coolers' DIY article published in March issue is quite useful! Where can I get the components used in the project?

**Pradeep**

**EFY.** Thanks for the feedback! Components used in the project are easily available at any electronic components retail shop, as well as online. You can get these from Lajpat Rai Market in Delhi.

FROM FACEBOOK

### EFY's Design Engineers Community

'Bi-Directional Motor Driver Using ULN2803' DIY article published in March issue is informative and easy to understand!

**Anmol**

**EFY.** Thanks for the feedback!

I am a subscriber of EFY magazine (both digital and print versions) since 2012 and have not missed a single issue till date. The customer support team is just amazing. Contents of this magazine appeal both to beginners as well as advanced users. I highly recommend this magazine to every electronics enthusiast. Keep up the great work!

**Tanmay Dasgupta**

**EFY.** Thanks for the feedback!

### EFY SUBSCRIPTION

I am a big fan of EFY group. I have enjoyed all your issues and found some really fascinating! Unfortunately, I am moving overseas for higher studies, and will not be able to continue the subscription from my side. I promise that I will access your digital magazines.

**Rahul Nambi Agas**

Through email

**EFY.** Thank you so much for the heart-warming feedback! We will miss you. EFY Group wishes you great success in all your future endeavours. Looking forward to having you as a patron of our digital platform.

### E-ZINE ONLINE VERSION

I can finally access the online version (e-zine) of EFY magazine. Earlier, I used to get an error message whenever I tried to open the e-zine. Now I can read the e-zine on both my computer and mobile. Keep it up!

**Adishesu Kumpati**

Hyderabad, Telangana

**EFY.** Thanks for the feedback!

### VOLTAGE STABILISER AND UPS

I am a regular reader of EFY magazine for the last 20 years. Good circuits for voltage stabilisers, UPSes, inverters and so on based on microcontrollers are missing in EFY. Expecting more circuits based on PIC microcontrollers in the forthcoming editions!

**Bino Joseph**

Through email

**EFY.** Thanks for the feedback! We will try to publish these as soon as we get suitable circuits from our contributors.
