

wideband measuring set. It was specially developed for assessing safety in electromagnetic fields. Unlike an adapted spectrum analyser, it provides users with operating modes tailored to each application for measuring individual transmission channels, and separate services such as analogue or digital radio, cellular radio, or wireless.

Semiconductor test SMU

NI has announced the PXIe-4163 high-density source measure unit (SMU), which provides six times more DC channel

density than previous NI PXI SMUs for testing RF, MEMS, and mixed-signal and other analogue

semiconductor components. PXIe-4163 SMU delivers increased DC channel density for higher parallelism in multisite applications and lab-grade measurement quality in a production-ready form factor.

TOOLS & EQUIPMENT

Automated dispensing system

Nordson EFD has introduced a new 4-axis automated dispensing system. Launched

under RV Series, the system features Dispense Motion software and a fully integrated CCD smart vision camera for high fluid place-

ment accuracy and control at any angle along the 360° rotational plane.

Evaluation board

Recom has released a breakout board (SBL-1) for its R-78S evaluation board to connect SensiEDGE's SensiBLE v1.0 sensor module. The board enables SensiBLE to draw stable 3.3V from an AA-size battery down to voltages as low

as 0.65V. Engineers can therefore replace the coin-cell battery with a higher-capacity single-cell AA-size battery and significantly increase operation life-time on a single battery.

MCU kits

STMicroelectronics has configured two STM32 Discovery packs that allow faster connectivity of Internet of Things (IoT) devices to cloud services over 2G/3G or LTE Cat M1/NB1 networks. Each pack contains an STM32L496 Discovery board and STM04+ Cellular expansion board featuring a Quectel cellular modem. The software includes the Espruino embedded JavaScript engine ported to the STM32L496 ultra-low-power microcontroller and an expansion package (X-CUBE-CLD-GEN) compatible with the STM32Cube ecosystem.

Input/output controller

COSEC ARC10800 input/output controller from Matrix controls multiple third-party devices performing multiple applications. It ensures ease in configuration of multiple devices. Furthermore, it can aid in elevator access control. Other key features include eight input ports with four state-supervised inputs, eight output ports with Form C dry-contact relays, Power over Ethernet (PoE), Ethernet and/or RS-485 connectivity, and LED indication for device and network status, respectively.

Robotics kit

Texas Instruments has introduced a low-cost robotics kit and classroom curriculum (TI-RSLK), which provide students with a deeper understanding of how electronic system designs work. The first

in the series, Maze Edition has more than 60 electronic and mechanical components, including SimpleLink MSP432P401R microcontroller (MCU) LaunchPad development kit.

MISCELLANEOUS

Industrial sealants, adhesives and coatings

Novagard's industrial sealants, adhesives and coatings offer the benefits of long service life, excellent weathering and

oxidation resistance, ease of installation, primer-less adhesion to most substrates, broad operating range (-40°F to 400°F), rapid cure with exceptional green strength, and low odour. Also, these are solvent-free.

Indoor strip lights

NTL Lemnis has launched Pharos Lasso 25W indoor strip light for retail and institutional sales. The light has an integrated driver and IP grade of 20. It is 5m long and comes with a special 3M peel-n-stick tape. The light can adapt to various indoor applications, and is equipped with a copper PCB for better heat dissipation.

Epoxy adhesive

Progressive Engineers has introduced 8330S epoxy adhesive. It is basically a two-part, smooth, silver paste that cures to form a hard, durable polymer, which is extremely conductive—both electrically and thermally. It adheres strongly to metals, glass and most plastics used in electronic assemblies.
