

CARRY YOUR COMPUTER LIKE A BOX OF CANDIES

In the ongoing quest for portability, personal computers have witnessed a shift in form factor from desktops to conventional laptops, 2-in-1 detachable laptops and down to tablets with wireless peripheral support. For those who want even sleeker form factor—small enough to carry in their palms—there are mini PCs. Here are some of the best mini PCs that can provide computing power as good as a decent desktop

Acer Revo One RL85

Acer Revo One

Acer's Revo One is taking the market by storm. Consisting of some solid hardware and internals, it brings the power of a moderate computer packed within a mini system.

At the core of Acer Revo One RL85-UR52 is an Intel i5-5200U dual-core processor that can reach clock speed

of 2.2GHz. Memory units include 8GB DDR3L RAM and 1TB hybrid HDD. The system also has a decent Intel Integrated HD Graphics 5500. For connectivity, there are two USB 2.0 and two USB 3.0 ports, a display port, an HDMI output port and an Ethernet port. The design is sleek, standing 15cm (6 inches) tall.

The computer comes with
