

maximum capping of 400 CADR, while pollen CADR is 450. Go for a device that offers higher CADR value within the said range. Optimally, an air purifier should have CADR rating of at least 300.

Air change per hour and fan speed. Air change per hour (ACH) indicates the frequency of air purification by the device within its stipulated area in an hour. Air purifiers offering an ACH of 4 and above are preferable. Fan speed determines how loud an air purifier will be. Higher speed may mean louder noise. So prefer an air purifier that has high ACH and CADR but can also be run on low or medium fan speed.

Other points to consider. Before you purchase, ensure that the air purifier has a sufficient coverage for your room/premises. Next, ensure that it is easy and economical to operate and maintain. Ask the vendor about the recommended cleaning and replacement intervals for filters and parts. Avoid ionisers and UV-light-based devices since these release ozone, which is bad for our lungs. Finally, ensure that the air purifier is AHAM or GB/T 18801 standard certified.

Market options

Go for an air-purifier from a known brand to ensure reliability and accountability. Different vendors offer different deals on warranties, servicing options and maintenance. Given below are some of the best products in the market.

Philips AC4372. This is one of the best offerings from Philips' air purifier inventory for larger rooms. It comes with a HEPA filter, an AC filter and a multi-carbon filter. It produces

Philips AC4372 air purifier

₹ 34,000.

Sharp FU-A80E-W. This air purifier, costing ₹ 27,500, is recommended for coverage up to 30sq.m (about 323sq.ft). It consists of a HEPA filter, which is said to be capable of 99.97 per cent filtration of 2.5PM contaminants. The purifier also comes with a pre-filter and an impressive 480 cu.m./hour CADR. It uses Plasmacluster Ion technology to remove odour without creating any ozone.

Mi Air Purifier 2. Mi's Air Purifier 2 is a good deal, given its low cost. Priced at ₹ 9000, it is said to be effective within an area of 21-37sq.m (300sq.ft). It can deliver CADR of 210cu.m./hour. The filtration capacity is strong with a 360-degree primary polyethylene terephthalate (PET) filter, in addition to an ultra-dense EPA filter and an activated carbon filter. It can be controlled over Wi-Fi using a smartphone.

There are many more offerings from these as well as other popular brands like Blue Air, Camfil, Kent and Eureka Forbes. Explore all the available options to select the best device for yourself. Just keep in mind the features we discussed above! **EPY**
