Dell Inspiron 20-3064

Desktop computers provide a sense of reliability and scope for customisation like no other form of portable PCs. However, one thing that always held the desktops back were the space they consumed. In this era of laptops, if you still prefer the desktop experience but want to save some desk space, invest in an all-in-one (AiO) computer system.

AiO systems are basically desktop computers that, instead of having an exclusive CPU, include all the processing components in a single unit with monitor. These come in varied configurations, ranging from basic-level systems to mid-scale setups, and even gaming and programming beasts. They look stylish, yet pack a punch of performance. So let's look at some of the most recommended AiO PCs that can rightfully replace your trusted desktop.

Dell Inspiron 20-3064

This all-in-one PC with 51cm (20-inch) screen is a reliable offering. Intended for

mid-level usage, it can match the performance of some decent desktop configurations. Inspiron 20 is powered by a 2.4GHz Intel i3 7th Generation processor, aided by 4GB of DDR4 RAM and two DIMM slots (which means it's expandable). It has a big 1TB internal storage space. The graphics unit is run by integrated Intel HD Graphics. The screen supports 1600 × 900-pixel display resolution. You get two USB 2.0 and two USB 3.0 ports, a 4-in-1 card reader, an audio output line, an HDMI port, an ethernet port and a headphone jack.

The PC runs on a 65-watt AC adaptor. It has a wide-screen integrated 720p webcam with a single digital microphone. In-built stereo speakers deliver quality sound output. There is also a tray-load read-write DVD drive. Presently, it is available at a price of ₹ 39,000. It can also be bought from offline retail stores.

Lenovo IdeaCentre 520

Lenovo has come up with a number of AiO systems under its IdeaCentre banner—ranging from basic home-systems up to high-end computers for heavy-load operations. Here we look at IdeaCentre 520, which is a mid-level computer in this series.

IdeaCentre 520 runs on an Intel i3 6006U processor and 4GB DDR4 RAM. Its stunning design is aided by 55cm (21.5-inch) Full HD borderless display.
