able video-calling experience. Ports include three USB 2.0, one USB 3.0, a 3-in-1 card reader, an HDMI port, an audio jack and an ethernet port.

Running on Windows 10 Home, Lenovo IdeaCentre 520 is a recommended market offering. It is priced at ₹ 40,000 and comes with one-year warranty. A more powerful model, called IdeaCentre 520S, is also available. It costs about ₹ 70,000 and packs i5 processor, 8GB RAM and other features similar to 520 iteration.

Asus Vivo AiO V221

Winner of the CES 2017 Innovations Award, Asus Vivo is one of the most attractive AiO PCs in the market. This 7.2mm slim desktop has a great appeal in terms of looks and performance. It packs a 7th generation Intel i3 processor in its basic form, and can be upgraded to an i5 or even

i7 if stronger processing capacity is required. The 55cm (21.5-inch) LED-backlit screen supports 1080p Full HD display resolution with 16:9 ratio. There are two ports for RAM, with a default 4GB 2133MHz DDR4 RAM. There is ample storage space with 1TB HDD inbuilt. You get an integrated 1MP camera and two 3W Sonic Master Premium audio speakers.

The device has one USB 2.0 port at the side, four USB 3.1 ports at the back, one 3-in-1 card reader (SD/SDHC/SDXC), an HDMI output port, a LAN port and an audio jack. The complete package starts from ₹ 35,000.

HP Pavilion All-in-One 24-q253in

HP Pavilion 24-q253in falls under higher mid-range. It is powered by a strong 2.4GHz quad-core Intel i5-7400T processor (which can reach turbo speed of up to 3GHz) with a pre-installed 4GB DDR4 RAM. The RAM can be expanded up to 16GB. What makes the PC even more powerful is Nvidia GeForce 930MX 2GB graphics unit. This complete combination make the HP Pavilion a decent bet for gamers and heavy users.

The PC has 60cm (23.8-inch) Full HD anti-glare IPS display and 1TB 7200rpm storage drive. You get multiple connectivity ports like two USB 2.0 and two USB 3.0 ports, a USB-C port, an SD card slot, an Ethernet port and a headphone jack. The system comes with 64-bit Windows 10 Home pre-installed and a wireless keyboard-mouse combo. It is covered by 3-year

limited service warranty. Costing ₹ 70,000, HP Pavilion 24-q253in meets all your computing needs.

Apple iMac (Source: apple.com)

Apple iMac

Apple has done a great job in fine-tuning its latest AiO iMac systems. Playing at the premium range, iMac is a powerful device with attractive display technology. There are a range of options in this series—the basic 55cm model, the 4K 55cm display variant, 68cm (27-inch) screen model and a premium high-end model. The Retina 4K display is quite stunning and definitely a major USP for the brand. Even the basic computer with 55cm LED-backlit screen is a big attraction. You get different choices of processors, starting from 2.3GHz Intel Core i5 with turbo-boost capacity up to 3.6GHz.

The graphics unit is pretty powerful: The entry system has Intel Iris 640 Graphics. The box also contains a proprietary Magic Keyboard and Magic Mouse for wireless connectivity.

AiO iMac runs MacOS High Sierra. It starts from ₹ 90,000, and is built to support almost any load—be it heavy programs, powerful games on 4K display or multitasking.

Of course, there are more options in even broader range of prices. Low-cost models may pack comparatively low processing power and RAM capacity, while expensive high-end systems (like Microsoft Surface Studio) may come with powerful features. Therefore we suggest you to explore further to find the perfect fit for your purpose. **EFY**
