

THE TOP TEN SMARTPHONES AND TABLETS AT A GLANCE

Phone	Display	Processor	Camera	Battery	Build	UI	Storage	Security	SIMs
Google Pixel XL	13.9cm (5.5 inches) 1440 x 2560	Qualcomm Snapdragon 621, 1.6GHz, quad-core	R: 12.3 MP F: 8 MP	3450 mAh	Metal, plastic and glass	Android 7.1 Nougat	32GB internal 4GB RAM	Face detection	1
One Plus 5T	15.2cm (6.01 inches) 1080 x 2160	Qualcomm Snapdragon 835, 2.45GHz octa-core	R: 20 MP F: 16MP	3300 mAh	Full metal	Android 7.1.1 Nougat	62GB internal 6GB RAM	Face detection, fingerprint scanner	2
Nokia 8	13.4cm (5.30 inches) 1440 x 2560	Qualcomm Snapdragon 835, 1.8GHz octa-core	R: 13 MP F: 13 MP	3090 mAh	Aluminium unibody design with metal	Android 7.1.1	64GB internal 4GB RAM	Fingerprint detection	2
Sony Xperia XZ Premium	13.9cm (5.50 inches) 2160 x 3840	Qualcomm Snapdragon 835, octa-core	R: 19MP F: 13 MP	3230 mAh	Metal body	Android 7.1.1	64GB internal 4GB RAM	Fingerprint scanner	2
Oppo F5	15.2cm (6.00 inches) 1080 x 2160	MediaTek MT6763T octa-core	R: 16 MP F: 20 MP	3200 mAh	Metal edges	Android 7.1.1	32GB internal 4GB RAM	Fingerprint detection, face recognition	2
Honor 8 Pro	14.4cm (5.70 inches) 1440 x 2560	Kirin 960 1.8GHz octa-core	R: 12 MP F: 8 MP	4000 mAh	Metal body	Android 7.0	128GB internal 6GB RAM	Fingerprint detection	2
Xiaomi Redmi Note 4	13.9cm (5.50 inches) 1080 x 1920	Qualcomm Snapdragon 625, 2GHz octa-core	R: 13 MP F: 5 MP	4100 mAh	Metal body	Android 6.0	64GB internal 4GB RAM	Fingerprint detection	2
Samsung Galaxy Tab S3	24.6cm (9.70 inches) 2048 x 1536	Qualcomm Snapdragon 820, 1.6GHz octa-core	R: 13 MP F: 5 MP	6000 mAh	Metal body	Android 7.0	32GB internal 4GB RAM	Fingerprint detection	1
Asus ZenPad 3S 10	24.6cm (9.70 inches) 1536 x 2048	MediaTek MT8176, 1.7GHz hexa-core	R: 8MP F: 5 MP	5900 mAh	Metal body	Android 6.0	32GB internal 4GB RAM	Fingerprint detection	2
Lenovo Yoga Tab 3 Pro	25.6cm (10.10 inches) 2560 x 1600	Intel Atom X5, 2.24GHz quad-core	R: 13 MP F: 5 MP	10200 mAh	Metal body	Android 5.1	32GB internal 2GB RAM	-	1

Storage. Nowadays, storage options include 16GB, 32GB, 64GB and more. Higher storage is required to store movies or play heavy games.

Security. Smartphones contain private data and pictures that we don't want to share with anyone. So, security features are important and can include fingerprint sensors or even iris sensors.

Service. Check whether the carrier and the Android phone support the newer, high-speed 4G networks.

Design. Look and feel of the device is also quite important. If the device fits in your hand, you can access its features easily.

Top ten smartphones and tablets

1. **Google Pixel XL.** Launched in Octo-

ber 2016, Pixel XL is made by Google itself. In India, the phone starts at ₹ 38,198. It is available on Amazon, Flipkart or Google's official website. Google Pixel XL has 1.6GHz quad-core Qualcomm Snapdragon 821 processor and 4GB RAM. It runs the 7.1 version of Android, and has an excellent performance in all areas, including battery life. It has a single SIM slot. One drawback of this device is its non-expandable storage capacity.

2. **OnePlus 5T.** Launched in November 2017, OnePlus 5T starts from ₹ 32,999. It is driven by a 2.45GHz octa-core Qualcomm Snapdragon 835 processor and 6GB RAM (which is the same as in your laptop). It provides dual SIM (GSM and GSM) option, and takes a nano SIM in each slot. It offers users super connectivity options including Wi-Fi, GPS, Bluetooth, NFC, USB OTG, 3G and 4G. However, its photo quality in daylight is not the best.
