Calendar of Forthcoming Electronics Fairs/Exhibitions/Seminars/Events

Name, Date and Venue	Topics	Contact address for details
TAITRONICS Oct. 9-12, 2018 Taipei Nangang Exhibition Center	International electronics show	Website: https://www.taitronics.tw
Open Source India October 11-13, 2018 Bangalore	Platform for the open source community to share what's new and exciting in open source languages, tools and techniques	Website: https://opensourceindia.in/oidays
GITEX October 14-18, 2018 Dubai World Trade Centre	Showcase of the world's most advanced technologies	Website: https://www.gitex.com/
electronica Munich Nov. 13-16, 2018 Munich, Germany	International trade fair for electronic components, systems and applications	Website: www.electronica.de

Since this information is subject to change, all those interested are advised to ascertain the details from the organisers before making any commitment.

Snippets

Telecom department to issue M2M communication guidelines

The department of telecommunications (DoT) will soon issue a policy document outlining guidelines to enable introduction of machine-to-machine (M2M) communication services in India, which will, in turn, facilitate roll-out of the Internet of Things (IoT).

IT ministry sets up panels for AI roadmap

The ministry of electronics and IT has formed four committees to prepare a roadmap for the national artificial intelligence (AI) programme. The committees will be headed by IIT directors and experts from industry bodies such as Nasscom, union minister for electronics and IT Ravi Shankar Prasad said.

SunSource to build 200MW solar park in UP

SunSource Energy, a solar EPC player in India, is boosting its portfolio with plans to develop a 200MW solar park in Uttar Pradesh at an investment of ₹ 9 billion. The company has also received funding from State Bank of India-led Neev Fund, which will help it reach its target of 1.5GW project capacity by 2025.

Infineon to support NITI Aayog's Atal Innovation Mission

Infineon will support Atal Innovation Mission

(AIM)—a flagship programme of the government of India—by sharing its design and manufacturing experiences and knowledge in semiconductor systems.

Namo E-waste revenues double

Namo e-waste, an e-waste recycling company in India, has announced that its revenues have more than doubled in one year, crossing ₹ 100 million in 2017-18. The company now plans to establish a world-class facility that includes technology for precious and rare earth metals from e-waste.

ST named among top 100 global technology leaders

STMicroelectronics has been named a 2018 Thomson Reuters Top 100 Global Technology Leader. The ranking honors a selected group of companies that have demonstrated a commitment to leadership across eight pillars of performance: financial, management and investor confidence, risk and resilience, legal compliance, innovation, people and social responsibility, environmental impact, and reputation.

Arrow Electronics to buy elfnorphics

US-based Arrow Electronics is acquiring elfnorphics, a product engineering and software R&D services company, for ₹ 18 billion, according to an *Economic Times* report. As a part of the pay-out, about 350 employees of the Ahmedabad-based company are expected to get ₹ 10 million each for their ESOP holdings.

Xiaomi won't raise phone prices, launches Mi TV

Smartphone maker Xiaomi will not increase the prices of its existing mobile phone models despite wafer-thin margins, benefiting local consumers in India who would otherwise have had to pay more after

increase in the levy on component imports.

Xiaomi plans to sustain its leadership by launching six to eight phone models this year, besides the Mi TV, for which it is exploring local manufacturing. It also expects offline sales to make up 30-40 per cent of its overall revenue by the year end. Xiaomi makes 95 per cent of its mobile phones in India through Foxconn's India arm.

C-DAC to focus on cancer research using supercomputing

Pune-based Centre for Development of Advanced Computing (C-DAC) will put a major thrust on cancer research in coming future through supercomputing.

"We are doing a lot of research in the area of bio-informatics, which is coming up in a big way. Our major focus is on cancer treatment using supercomputers as tool. We have interacted with Tata Memorial Hospital, Mumbai, and National Cancer Institute in US for doing simulation on P53 molecule on our system," C-DAC director general Dr Hemant Darbari said.

P53, also known as TP53 or tumour protein, is a gene that codes for a protein that regulates the cell cycle and hence functions as tumour suppressor.

IBM eyeing BFSI, telecom sectors for growth in India

When it comes to digital transformation, sectors like the banking, financial services and insurance (BFSI), and telecom will become the growth engines for India. IBM is ready to meet the technology requirements—shared a top IBM executive at a two-day *The THINK Forum* organised recently.

"The biggest growth for us is going to come from the financial services. We are going to consolidate telco and look at new revenue streams because telco is an industry that is turning on its head," Lula Mohanty, managing partner, IBM Global Business Services, told IANS.

IBM is also very interested in the retail industry in terms of Internet of Things (IoT) platforms as a service on products.
