

could be installed on at least 70 per cent of the DGs in the targeted areas. Thus, it will reduce total particulate matter (PM) generation from all diesel generators in the area by 53 per cent (with 75 per cent efficiency). In Delhi, it will reduce the total PM2.5 emission by almost 8.4 per cent (since DGs contribute to 16 per cent of PM2.5 emission).

In parallel, the team is also working on technologies to capture other emission components (NOx and SOx) and explore other sources of pollution like furnaces, diesel vehicles and power plants.

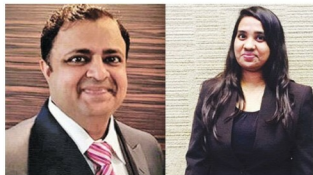

It has received accolades such as:

1. General Atlantic Echoing Green Fellowship, 2017
2. Urban Labs Innovation Challenge by University of Chicago, 2016
3. Top 3 Hardware Startups in Asia ranking by American Society of Mechanical Engineers
4. Forbes 30 Under 30 ranking under Social Entrepreneurs category

BlackBox To Analyse Vehicle Accidents

Founded by Aswini Rao Nunna, Swadhin Sonowal and Gaurav Kumar, Cyrrup Solutions is in the business of safety. Its initial focus is on the telematics sector, specifically in four-wheeler commercial vehicle safety. It intends to reduce the number of accidents happening across Indian roads by installing Internet of Things (IoT) devices with multiple sensors. The solution is supported by backend computer algorithms to help analyse drivers' behaviour and provide actionable insights.

The solution, Vehicle BlackBox, is a blend of software, firmware and hardware. It is said to be first of its kind in India to initiate scientific road-crash

Co-founders Gaurav and Aswini of Cyrrup Solutions

FIND THE PROBLEM...

BEFORE THE PROBLEM FINDS YOU.

- Thermal Cameras
- Clamp Meters
- Multimeters
- Non-Contact Voltage Detector
- Moisture Meters
- Flex Clamps
