

The video surveillance market is growing at an exponential rate of 30 per cent year-on-year due to increasing awareness about the requirement for better security. Video surveillance is a vast domain comprising small and big players alike. A majority of Chinese players provide boxed products rather than overall solutions, which is not the need of the hour in the Indian market. Most of the players in the current market focus on IP products as their scope is increasing.

Implementation of smartcity plans, traffic surveillance and security in educational institutions, railways and hospitals are sectors where the government is looking to bring in reforms. The Indian surveillance market has ample opportunities for growth and advancement.

The Indian market, however, is very price-sensitive, and since the supply base is not one whole unit, buyers can choose from an array of dealers and suppliers in close proximity to their areas. This may sound

like a minor issue but serves as a growth prospect to several dealers and vendors. The ones with the right marketing strategy and scalable equipment gain from this vast diversity. In hindsight, the Indian market is large enough and possesses ample opportunities for dealers who have great insight into how to use surveillance systems to improve their cities.

Opportunities for electronics

Over half of the security and surveillance market growth is expected to come from demand in new equipment, especially for electronic surveillance, mine detection and early warning systems. This is a huge opportunity for domestic as well as international suppliers of electronic components and devices as electronics is a key component in homeland security products.

Majority of the demand is expected to be for explosive detection and containment; electro-optical infrared (EO-IT) sensors including night-

vision devices, intelligent airfield and runway surveillance systems; identification and classification systems; perimeter control including boom barrier, door-frame metal detectors and scanners; hand-held body scanners, baggage scanners, access control systems including biometrics and RFID cards; surveillance including intelligent surveillance systems, mobile video surveillance, CCTV and PTZ cameras, and so on. The list is rather long!

A look at the above list reveals that electronics has a pivotal role to play in modern inland security initiatives. The government of India is planning to implement satellite-based surveillance, laser-based protection systems on the borders across land, mountains and water as well as drone-based surveillance for internal security. All of these technologies are driven by electronics; hence, there is a dire need for India to develop these products indigenously and manufacture these locally for sustainable self-reliance. **EFY**

TAIYO YUDEN Wireless Module Product Lineup

Personal Area Network

Bluetooth® LE (Basic Type)

■ BT4.2 - Cortex-M0 (nRF51)

ESYGNCZWY
ESYGNCZX

ESYGINZWY
ESYGINZX

ESYAGNZXX

BT4.2, STD, Antenna, 32KHz clock DC/DC

BT4.2, Small, Antenna

BT4.2+ANTM™, Small, Antenna

■ BT5.0 - Cortex-M4/M4F (nRF62)

ESYHCNZWZ

ESYHUNZWZ

ESYH5NZWZ

BT5.0+ANTM™, STD, Antenna, 32KHz clock DC/DC

BT5.0+ANTM™, Small, Antenna

BT5.0+ANTM™, Ultra Small, Antenna

ESYKBNZWZ

ESYICNZWW

Full BT5.0+802.15.4 (Thread) High performance

BT5.0, STD, Antenna, Simple

Under Development

Local Area Network

WLAN: IEEE802.11 SDIO

■ 2.4GHz (11b/g/n)

WYSAGVDX7

11b/g/n, Low-P, Antenna

■ 2.4GHz+5GHz (11a/n/ac)

WYSBHVXGX

BT4.2, SMD

WYSAGVDXG

WYSBHVXGX

1x1 11ac, BT4.2, SMD w/ Antenna

Under Development

1x1 11ac, BT4.2, SMD w/ RF connector

WLAN: IEEE802.11 SW Embedded

WYSACVLXY-XX

11b/g/n + CPU, SMD, Antenna, Cortex-M4, TV app.

Navigation System

GPS/GNSS

GSYFFMAXB

GSYFFMAXC

GPS with CPU, Memory, SMD

GNSS with CPU, Memory, SMD

GSYFDMAXB

GPS with CPU, Memory, Antenna

- Production
- New, U/D items
