Suppose you will be flying to Bengaluru tonight for a two-day business trip. You have to carry everything starting from your keys, pens and clothes to laptop, charger, power bank and storage disk—

and you feel your briefcase is becoming heavier every second. Moreover, the more the items you carry, the higher the chance of misplacing something!

How about a briefcase that has its own power bank or charger instead? Or one that alerts if you left something behind? Well, smart briefcases are built to do that. These almost-all-in-one briefcases act as laptop bags, charging docks, projectors,

cameras and what not! Here are some of the most innovative briefcases that can ease your tour.

Looking for a complete smart package?

If you want something secure, handy, traceable as well as spacious, iMbrief briefcase is the best bet for you. It comes with three kinds of lock systems that
