

The Evolution of the Instrumentation Amplifier

When Accuracy Counts

Trying to accurately amplify small signals in an electrically noisy environment? Microchip has you covered with our Instrumentation Amplifiers (INAs). Offering high common-mode rejection, zero-drift technology, EMI hardening and lower power results in a bullet-proof amplifier optimized for battery-powered applications.

Highlights

- DC to RF noise immunity for demanding environments
- Perfect for battery-operated portable applications
- EMI hardened
- Small footprint
