

The LED Revolution: Outdoor Lighting from OSRAM Opto Semiconductors

LEDs from OSRAM Opto Semiconductors deliver energy efficient lighting solutions for various outdoor LED lighting applications.

Outdoor Competence

India is the fourth largest country in the world in electricity consumption. At such, improving efficiency of power consumption from street lighting is one very important domain because it consumes a total of 18% to 38% of the total energy bill according to the global trend*. At OSRAM Opto Semiconductor, our leadership in high quality and high power value LEDs can help to mitigate the challenges faced for such outdoor applications, reducing unnecessary fitting efforts, expenses and heavy maintenance cost. More importantly, our portfolio also meets the Energy Efficiency Services Limited (EESL) requirements that was set-up under the Ministry of Power in India.

The Economic Times online media reported on 28 April 2017 that "Replacement of 21 lakh conventional street lights with LEDs has resulted in annual energy savings of 295 million unit and reduction of 2.3 lakh tonnes of CO₂ annually."

Functional Street Lighting

The solutions to meet tomorrow's mobility needs are more than steel beams and concrete slabs. They are demanding multifaceted projects requiring a lot of sensitivity and accurate planning. It's important to care about the details. Like the durability and maintenance of items with a certain life span, or the certainty of meeting all the legal requirements in one of the most regulated business sectors.

So when it comes to street lighting, choose LED components from a partner with decades of experience and the power to help you accomplish your project. OSRAM's broad portfolio of robust yet easy to apply LEDs offers a

spectrum of infinite possibilities. Different lighting conditions, high concentrations of pollutants, dust and extreme humidity create an atmosphere that require tough and durable lighting systems. It's the perfect environment for modern LED applications. Our leading OSCONIQ® P and OSLON® portfolio is appreciated by officials and drivers alike. It comes with superior reliability and long lifetime, which is crucial, as a city never sleeps. Plus, it is designed to not distract drivers from the road. You can be sure that. OSCONIQ® P and OSLON® LEDs perfectly fulfill all the requirements in one of the most challenging fields and will support your visions. All because of our decades of lighting experience. We are here to help you guide people. Start something bright.

Which LED components for Street Lighting?

OSRAM Opto Semiconductors offers a broad range of LED portfolio and optimized products to meet the specific requirements of every application field including meeting the EESL requirements.

OSCONIQ®P, OSLON® SQUARE & DURIS®S are recommended for high efficacy and long lifetime, enabling significant energy savings. They are our professional LED products that comes with best-in-class reliability and performance. All have been successfully designed in and widely used in many of our outdoor application projects in Europe and India.
