Exideal LED beauty device EX-280

available in the market are:

Face roller. This device creates a weak electric impulse when you roll it on your face and skin, helping to keep your skin young and firm. It also comes with a stand that you can use to warm up the roller and make the experience even more pleasant.

Micro-foaming facial cleanser. Equipped with soft bristles and a vibrating mechanism, this device works up lather and gives your face a much-needed massage after a long day. Some of these facial cleansers also come with interchangeable brushes, which are great for exfoliating or removing dead skin cells.

Exideal EX-280. This is yet another treat for skin that you don't even have to touch on your face in order to release its magical powers. It resembles a hand mirror, but instead of a reflective surface, it has LED lights. These lights emit different wavelengths, which, when combined, have a beneficial effect on your skin, helping it preserve a youthful appearance.

Eyelash curler. These devices are pretty much tiny versions of your hair curling wand—they do actually heat up and are supposed to give your lashes a complete makeover.

Dreamin head. Looking like a futuristic biker helmet, this device has a massaging mechanism that fits along your neck and scalp, a heating pad at the back of head, and pulsating airbags across forehead. Aside from helping with headaches and stress, it does wonders for hair.

Meme steamer. Spending too much time in front of screens can cause serious damage to your eyes—mainly due to loss of moisture. Meme steamer helps your eyes relax and rehydrate after a long day.

Hot and cold face plates. This device is a small double-sided plate meant to rejuvenate the skin of your face. One side of the plate heats up to 42 degrees Celsius, while the other side goes down to approximately 12 degrees Celsius. Thus the device gives your skin a bit of a shock by alternating between cold and hot plates, keeping the skin healthy and firm.

Nano-care hair dryer. This device doesn't just dry your hair by blowing wind about but creates a nano-ionic wind that restores the moisture balance in the hair and scalp, making your hair stronger and resistant to damage from brushing. **EFY**

find everything you need to create a stylish new look. Whether you are looking to reduce fine lines or wrinkles, treat spot-prone skin or just want your face to look softer and brighter, there are a host of skincare tools out there which claim to fulfil your requirements.
