Headphones

For an immersive audio experience

Skullcandy's new wireless headphones, Venue offers a noise-cancelling experience designed for everyone—co-workers, roommates and commuters—struggling to find their own space in shared working, living and travelling environments. Venue's active noise cancelling (ANC) technology delivers powerful performance so that users can tune into what matters most to them, music that they can feel. When they need to tap into the outside world, Monitor Mode lets them hear their surroundings with just a push of a button.

Venue is embedded with Tile technology that allows users to track or find the headphones through Tile app on a mobile device. With up to 24 hours of battery life, Bluetooth capability and a premium travel case, Venue keeps the music going wherever it goes. It is also equipped with Rapid Charge technology, providing five hours of battery life with a 10-minute charge.

Gaming TV

Enhanced picture quality with wide colour enhancer

Truvision has extended its TV portfolio with the launch of TW2462 61cm (24-inch) gaming TV, paired with a high-performance engine and high-speed response, bringing versatility to the gaming experience. The TV comes with several inbuilt NES games and 1080-pixel full-HD IPS display that can create perfect blacks with an infinite contrast ratio, along with instantaneous response time and fast-moving scenes, making the users relive the gaming era. The powerful 20W speakers, crafted with Dolby Digital Sound, add a new dimension to the audio-video experience.

The TV supports a multitude of connectivity options including one HDMI input and two USB inputs, allowing users to stream movies and music from a pen drive or HDD conveniently.

Smartphone

Featuring a powerful battery

Panasonic has unveiled its latest Big View Display smartphone in Eluga portfolio, Eluga Ray 600. It comes with 15.2cm (5.99-inch) HD IPS display screen, 1.3GHz quad-core processor, 3GB RAM, 32GB internal memory (expandable up to 128GB) and OTG support—all powered by Android 8.1.0 Oreo operating system. With 4000mAh battery, the smartphone is a powerhouse, giving ample backup to the phone to last an entire day. It boasts of an integrated 13MP auto-focus rear camera and 8MP front camera with flash.

Panasonic Eluga Ray 600 is equipped with Arbo Hub app, which allows users to de-clutter their smartphones by replacing multiple apps with one single app. It features a multi-function FPS button, which allows users to access their phones and applications with just a single touch and click a selfie, too. The phone also comes with a free subscription of Google Play Protect, which scans all applications and keeps the phone free from harmful malware.
