

Speaker

Powerful sub-woofers with enhanced bass

JVC has announced its newest 2.1 home audio speaker range XS-XN21, which is armed with cutting-edge sound technology that offers an immersive audio experience with dramatic styling and unique LED lights. Boasting powerful sound clarity with 500W PMPO, the speaker brings an edgy roughness balanced with style. The 10.2cm (4-inch) sub-woofer system packs the loudest sound possible. The speaker produces thumping sounds with 16W output power.

The speaker connects to smartphones, laptops or smart TVs using the inbuilt Bluetooth feature. Users can also connect USB devices or SD cards to play songs. In addition, aux allows direct connection to the speaker. It also comes with inbuilt FM radio.

Security camera

Wireless camera with 350-degree pan and 90-degree tilt rotation

iBall has launched iBall Guard Toto smart HD PT camera, iB-HDP103SAF—an economical solution for the safety of homes, small offices and shops. The camera is Wi-Fi-enabled and sends alerts to smartphones and tablets on detecting motion.

Embedded with 1.0MP high-resolution HD camera and encased with six surface-mount diode IR LEDs, the camera provides superior clarity up to 10 metres, even at night. With around-the-clock vigil, Toto PT camera keeps users informed of all happenings. With 350-degree pan and 90-degree tilt feature, it can be rotated and angled as per the area to be covered, leaving no uncovered spots.

Smartwatch

Designed for modern needs

Expanding its portfolio, Astrum has announced smartwatch SW300, which multi-functions as a smart device when synchronised with a smartphone. It comes in a wide circular design, with 3.3cm (1.3-inch) full-coloured TFT screen. It supports sedentary and water-drinking reminders, which pushes users to achieve their daily targets. To interact with the watch, users can tap and speak to Siri, who operates all commands and guides them.

Acting as the true fitness buddy, the smartwatch is equipped with 200mah battery that requires two hours of charging. The full-day blood pressure and heart rate recording makes it a valuable training and performance-tracking tool. When an anomaly is detected, the smartwatch automatically sends an alert to the users.

SW300 can make and receive phone calls directly via Bluetooth-connected cellphones, and display real-time messages, including WeChat and incoming phone call notifications. All of this allows users to stay connected with their friends, family and business associates.

It also offers sleep tracking, which includes sleep stages, sleep routine reminders and sleep coaching. Integrated with an advanced security feature, its anti-lost feature helps users locate their phone at the time of emergency. The smartwatch is IP67 water-resistant.
