Power bank

Made in India, made for India

Ambrane widens its mobile accessories portfolio with its wireless range of power banks, with the launch of PW 11 and PW 20, compatible with all Qi-enabled devices. The devices with their comfortable and secure grip for the devices bring a super-fast charging experience.

To start wireless charging, place the smartphone on the power bank, and the 5W of output power instantly charges the device. The power bank can also charge devices via cable.

Fabricated with lithium-polymer battery, the 10,000mAh power banks can withstand 500 power cycles and fully charge most smartphones up to two to three times per cycle.

The wireless series is constructed with multiple chipset protection that provides better security features and efficiency rate of 90 per cent, wherein the powerbanks automatically adjust output based on the device.

Speaker

Suitable for any adventure

HARMAN International launches JBL Xtreme 2 portable speaker in India. The second generation of JBL Xtreme comes with a durable design and powerful audio performance, up to 15 hours of playtime and IPX 7 rating for a full waterproof design. JBL Xtreme 2's rugged, waterproof feature allows it to be submerged in water.

The speaker features a built-in rechargeable 10,000mAh lithium-ion battery. JBL Connect+ feature can be used to wirelessly connect more than 100 Connect+ enabled JBL speakers, amplifying the experience through a connected ecosystem. Bluetooth streaming capability allows up to two users to connect at the same time.

JBL Xtreme 2 incorporates a noise- and echo-cancelling speakerphone, allowing it to be used to make clear calls in any environment when paired with a smartphone.

Gaming mouse

With dynamic 360-degree RGB ring lighting

HyperX, the gaming division of Kingston Technology Co. Inc., has released HyperX Pulsefire Surge gaming mouse with RGB lighting in India. It delivers pinpoint accuracy with its Pixart 3389 sensor and a resolution of 16,000 DPI. Left and right button switches are rated up to 50 million clicks using Omron switches for exceptional click feel, response and consistency.

HyperX Pulsefire Surge also offers radiant 360-degree RGB light ring with effects that can be personalised using HyperX NGenuity software, allowing gamers to personalise colours to match the system or environment for an immersive gaming experience. Advanced customisation tools include sensor performance settings, macros and DPI settings.
