

Some more features. Check for the expected lifespan mentioned on the box of the tubelight while making a purchase. Ideally, an LED tube should be expected to run for at least 30,000 hours on regular-use basis.

Many tubelights come with the option of dimmers or remote controls. Of course, these luminaries are costlier than standard ones. Dimmers are installed on the control switches. Wireless (Bluetooth- or Wi-Fi-enabled) lights can also be controlled through smartphones. Some benefits of these LED lights include brightness adjustment as desired, remote switching on/off and dimming of lights, better aesthetic appeal and, of course, more electricity savings.

Some tubelights can also be retrofitted on existing fluorescent tube fixtures. These save the cost of buying new fixtures. However, installation is a little more complicated and overall cost may be high. Most LED tubelights nowadays come with integrated fixtures.

Market choice and tips

It is advisable to select LED tubes from reliable brands to ensure a long life. In addition, the vendor must provide a warranty of at least two years. Most tubelights come in the form of T5 (thinner diameter) and T8 (wider diameter)—this depends on the type of fixture. However, diameter generally has no noticeable impact on brightness and power consumption, especially in case of households and small offices.

Here are some deals from popular brands that provide LED tube lights.

22W LED batten by Wipro Lighting. Wipro Lighting offers domestic tubelight models of 2400 lumens with 22W consumption rate. These come in LED batten light form factor, with 6500K colour temperature. Other colour choices are available, too. The

Wipro Lighting LED

lights are covered by a warranty of two years and are available for ₹ 369 per unit online.

Crompton Slim Ray 18W tubelight. This tubelight delivers 1800 lumens of brightness, while consum-

Crompton Slim Ray

ing up to 18W electricity. Overall efficiency of the tube is 100 lumens per watt. It is also covered by a two-year warranty. The LED tube is priced at ₹ 385.

Eveready 22W straight linear LED tubelight. Eveready brings 22W,

Eveready LED

2200 lumens, T5 LED tubelights producing 6500K colour temperature, at the cost of ₹ 349 per unit.

Syska T5 LED tubelight. Syska offers an LED tube that produces 1800-lumen brightness with a consumption

Syska LED

rate of 22W. It has an expected lifespan of 50,000 hours. The tubelight is available online for ₹ 398.

Philips T-Bulb. While more relatable as LED bulbs, T-bulbs can take

Philips T-Bulb

the place of tubelights in areas where a bulb fixture exists. These bulbs produce 800-lumen brightness, drawing 8W power. Philips T-Bulbs are available for about ₹ 200 a unit. **EFY**
