

“

Advertising is salesmanship mass produced. No one would bother to use advertising if he could talk to all his prospects face-to-face. But he can't.

”

-Morris Hite

Two-in-one laptops: (a) with detachable screen (b) foldable 360-degree screen with Wacom pen

easily find laptop screens with resolution higher than 1920×1080 . If you are willing to shell out some cash, you can go for 4K ultra-HD displays with a resolution of 3200×1800 , 3840×2160 or higher. Dell XPS, Lenovo Yoga, Acer Predator, HP Spectre x360 and MSI WS63VR 7RL are some laptops that come with this feature.

NVIDIA Pascal GeForce graphics card. If you are fond of games and/or like to try virtual reality (VR) applications, you need an NVIDIA graphics card. The range starts from GTX 1050 for low-end devices, to GTX 1080 for high-end ones.

The latest is NVIDIA GeForce GTX 1080 TI. It allows you to play AAA games at desktop-class frame rates. Laptops that have this feature are Alienware 15, MSI GT73EVR 7RF Titan Pro, HP Omen X17, Acer Predator 17X and Asus ROG.

Bluetooth 5. This is the latest version of Bluetooth with features such as high throughput, long range, increased broadcast capacity and improved channel coexistence algorithm.

There are four possible data rates with Bluetooth 5: 125kbps, 500kbps, 1Mbps and 2Mbps. 2Mbps offers higher throughput possibilities,

which can revolutionise the scope, appeal and spread of Bluetooth.

Two-in-one laptops. These new-generation laptops give you two experiences in one system—of a laptop and a tablet. These can fold up to 360 degrees, and the screens can be detached for a tablet experience. Many such laptops are available in market including HP Spectre x360, Asus Zenbook Flip, Dell Inspiron 13 and Lenovo Yoga. Some laptops are available with Wacom pens for advanced applications.

Some examples include HP Spectre x360, Lenovo Yoga 920, Dell XPS 13 and Microsoft Surface Book 2.

Wi-Fi 802.11ac. This new wireless standard gives speeds up to 10 times faster than older wireless standards (802.11n or older), at an increased distance coverage from the router. It can achieve 500Mbps speed through single-link and 1Gbps through multi-station WLAN. It features in most new laptops, like Acer Aspire, Asus Chromebook, HP Stream Laptop PC and Microsoft Surface Book.

Touchpad and display. Asus has launched Zenbook Pro, the world's first laptop with a touchscreen trackpad, in place of the traditional trackpad. Its 14cm (5.5-inch) full-HD IPS display enables you to push the cursor around and interact with the laptop.

Laptops with touchscreens are quite convenient. Touchscreen displays allow versatile interactions with the machine. Examples are HP Spectre x360, Acer Spin 5, Microsoft Surface Book 2, Google Pixel Book and Lenovo Yoga. **EFY**
