Delhi streets get 135,000 power-efficient LED lights from Tata Power

Tata Power Delhi Distribution (Tata Power-DDL) is making New Delhi's streets brighter by replacing existing high-pressure sodium vapour lamps and semi-high mast lights with brighter and more energy-efficient LED lights. Tata Power-DDL is executing the second phase of Municipal Corporation of Delhi's Street Light Project in partnership with Havells India, installing LED lights in 104 wards of North Delhi Municipal Corporation area.

The company has already completed the first phase of the project within set timelines, converting more than 85,000 streetlight points to LED lights. The work in the second phase is also progressing, with more than 52,000 LED lights already replaced, taking the total to 137,000 points. This phase will be completed soon, too.

This project will help reduce consumption of power by streetlights during peak-load periods, thereby reducing overall peak demand by more than 15MW, translating into considerable power savings.

Trina Home rooftop energy solutions launched in India

Chinese solar energy major, Trina Solar has launched Trina home, India's first solar energy kit for residential use. The company has targeted the renewable energy needs of households and small and medium enterprises in the country.

The kit comes in 3kW, 5kW and 10kW capacities, and comprises rooftop components like modules, inverters, grid boxes and mounting systems, which differ with variations. An app has also been included for monitoring purpose of power generation. Trina Home kits come with 25-year module performance warranty.
