

BEL to start defence industrial corridor in Uttar Pradesh

Bharat Electronics Ltd (BEL) will set up its manufacturing unit as part of Uttar Pradesh's defence industrial project. Creation of a defence industrial corridor in the state to accelerate the defence force's equipment production was announced in February this year.

PSLV-C42 of ISRO launches two foreign satellites

Polar Satellite Launch Vehicle (PSLV-C42) of Indian Space Research Organisation (ISRO) launched two satellites named NovaSAR and S1-4 from Satish Dhawan Space Centre SHAR, Sriharikota. PSLV-C42 lifted off from First Launch Pad of SHAR at 10.08 PM (IST). Both satellites were injected into the Sun-synchronous orbit, about 17 minutes later, at an altitude of 583 kilometres.

Tech City to come up in Guwahati

In a major boost to promote manufacturing in Assam, union minister of electronics and IT Ravi Shankar Prasad and state chief minister Sarbananda Sonowal jointly laid the foundation stones for two electronics manufacturing units and a common facility centre named Start-up World of Innovation in Future Technologies at the electronics manufacturing cluster in Tech City, Bon-gara, Guwahati.

Honda to introduce EVs in India

Honda has plans to come to India with its electric vehicles (EVs), provided that the market is good for business. Rajesh Goel, senior vice president and director (sales and marketing) Honda Cars India Ltd, said that the company is mapping out an EV strategy for India, and is looking to deploy multiple technologies, including hybrids, in EVs that can aid in reducing air pollution.

Mahindra commits to carbon neutrality by 2040

Mahindra & Mahindra announced its

commitment to become carbon neutral by 2040. The company will be partnering with Environmental Defense Fund to achieve this goal. Its emphasis will be on energy efficiency and use of renewable power.

Indus Towers restores 2500 telecom towers in Kerala

Telecom infrastructure firm Indus Towers has restored all its affected mobile towers in flood-hit Kerala. More than 2500 telecom towers of Indus were being operated on diesel generator support due to power outage. The company had arranged for more than 300,000 litres of additional diesel with the help of government agencies.

Mitsui to set up solar panel testing and certification lab in India

Mitsui Chemicals is planning to construct a BIS-certified solar panel testing and certification lab at Ahmedabad, in partnership with PI Berlin, for testing and certification of solar photovoltaic panels.

Brabourne Stadium becomes the world's largest rooftop solar panel installation at a cricket venue

Cricket Club of India, based in Brabourne Stadium, has installed 2280 solar panels of 360Wp rating each, on the roof of west and north stands of the stadium. The combined power generation capacity of these panels is 820kW. The solar rooftop project is supposedly the largest of its kind in the world.

Jaipur, Bengaluru among world's top 10 smart renewable cities

Jaipur and Bengaluru have made it to the list of top 10 smart renewable cities in the world. Accounting and consultancy firm Deloitte prepared the list as part of its Global Renewable Energy Trends report. The concept of smart renewable cities revolves around solar and wind powers to achieve smart city goals. The idea is to make efficient use of renewable resources with technology.

be the biggest in West Bengal. Sources aware about the development told *Economic Times* that Jio has already put in an application to West Bengal government to lease 161,874sqm (40-acres) of prime land on a long-term basis for setting up the proposed data centre.

This announcement comes after Mukesh Ambani's announcement back in January that Reliance Industries Ltd

will invest as much as ₹ 50 billion in West Bengal to boost the company's operations, its digital ecosystem as well as the group's retail and fuel businesses.

Cisco signs pact with BSNL, Niti Aayog to boost technology

Chuck Robbins, chief executive officer, Cisco, met Prime Minister

A new wave of electronics discussed at 43rd ELCINA-EFY Awards

India's electronics system design and manufacturing (ESDM) industry is going through a paradigm shift, empowered by newer technologies and the ecosystem becoming denser than ever. At 43rd ELCINA-EFY Awards held on September 14, 2018, chief guest Ajay Prakash Sawhney, secretary, Ministry of Electronics and Information Technology (MeitY), said, "Indian companies are at the helm of affairs in electronics. Most large companies of the world are in India today, not just for our IT, ITeS or BPO services, but for core designing of electronics."

"The world is moving towards automation rapidly. In the new world order, there is a risk of people losing jobs. That must be thought about as we move forward with these technologies," said Ramesh Chopra, executive chairman, EFY Group.

Many insights were shared by industry dignitaries under a panel discussion, where they discussed the future of the Indian ESDM industry. The panel predicted that, in the next 10 to 15 years, India's electronics component production ecosystem will be able to compete globally.

This was followed by the prestigious awards ceremony. Awards were distributed across categories such as exports, quality, environmental management, R&D and entrepreneurial excellence, among others. Special jury awards were also announced.

Industry veterans also shared their vision for the new wave of technologies that has touched upon the nation's horizons.

Narendra Modi during his three-day visit to India. He signed agreements with state-run telecom firm Bharat Sanchar Nigam Ltd (BSNL) and country's planning panel National Institution for Transforming India (Niti Aayog). They discussed various aspects related to technology as well as innovation.

The two agreements were signed under the aegis of Department of Telecommunications in the presence of Aruna Sundararajan, telecom secretary. The two will set up a location to demonstrate use cases using 5G to solve citizen problems in areas such as education, healthcare and agriculture using technologies such as the IoT, surveillance and AI.
