DC-to-DC controllers

Renesas Electronics has announced two new PMBus-compliant, fully-digital DC-to-DC controllers that provide single output point-of-load conversions

for FPGAs, DSPs, ASICs, network processors and general-purpose system rails. ISL68300 with integrated MOSFET drivers and ISL68301 with PWM output simplify designing power supplies for data centres, wired and wireless communications, and factory automation equipment.

Capacitive touch switches

Bulgin has launched a range of rugged capacitive touch switches ideal for repetitive operation. The sealed IP68-rated switches are activated by the touch of a finger and can be used across a wide range of applications from heavy industrial to consumer appliances. As the switches feature no moving parts, these require no operating force to activate, offering both ease of use and a long life expectancy of up to 50 million operation cycles. In addition to being both dust- and water-resistant, the switches are also vandal-resistant.

DC-to-DC buck regulators

Allegro MicroSystems has announced A8660, ARG81880 and ARG81801 regulators. These devices reduce EMI through switching frequency dithering

and allow system noise management through external clock synchronisation. These are AEC-Q100 automotive qualified, designed to operate over a wide

input voltage range to withstand automotive stop/start, cold crank and load dump conditions, and are also capable of switching at 2.2MHz for reduction in component size and cost.

TEST & MEASUREMENT

Digital multimeter

Model 450B+ TRMS by Meco Instruments is a 20,000-counts auto-ranging digital multimeter with LCD backlight having voltage range up to 1000V DC and 750V AC (TRMS), and current range up to 10A AC (TRMS) and DC. Basic accuracy for DC voltage $\pm 0.5\%$ rdg + 3dgt, for AC voltage $\pm 1.0\%$ rdg + 3dgt, for DC current $\pm 0.8\%$ rdg + 3dgt, and for AC current $\pm 1.0\%$ rdg + 3dgt. It has special features like auto power off, resistance, capacitance, frequency, duty cycle, diode test, audible continuity and more.

Pocket light meter

Extech LT505, a pocket-sized auto-ranging light meter, offers wide light intensity ranges measuring up to 40,000Fc (400,000lux) with high resolution of 0.01Fc (0.1lux). It is ideal for indoor lighting tests and for checking security and safety illumination in parking garages, night-time ATM areas, stairwells, landings and hallways.

Key features are:

- Measures light levels in foot-candle (Fc) or lux units using a precision photo diode with cosine and colour-correction filter
- Zero/calibration function
- Data hold and min/max functions
- Auto power off with disable

Tachometer

KUSAM-MECO has introduced a two-in-one photo non-contact/contact tachometer, model KM-2241, with measuring range up to 2.5-99999rpm. Measuring rotational speed is safe and accurate without attachment to the object. The meter has a wide measuring range and high resolution. Display gives exact rpm with no guessing or errors. It uses an exclusive micro-computer LSI circuit with high accuracy of measurement and fast measuring time. Last/maximum/minimum value is automatically stored in memory and can be displayed by turn any time.

SOFTWARE

Deep packet inspection solution

Rohde & Schwarz has announced the release of Discord application classification feature in its deep packet inspection (DPI) engine R&S PACE 2. The OEM software solution can now reliably detect and classify chat application Discord in network traffic in real time. Discord is a modern voice and text chat app, similar to programs such as Skype or TeamSpeak, designed specifically for gaming communities.
