Monitor

Designed to reduce eye strain in any lighting environment

BenQ has unveiled BenQ EL2870U, the first 4K UHD monitor with 1ms response time designed specifically for eye-care. BenQ EL2870U eye-care monitor features high dynamic range (HDR) technology to increase the overall dynamic range between true-black and bright-white to duplicate what your eyes see in the natural world. Enhanced with 4K ultra-high-definition resolution offered on EL2870U, you will experience extraordinary clarity of fine details and textures for the optimal viewing experience, and enhanced screen real estate for visually-intensive work.

EL2870U displays HDR for dazzling brightness with stark contrast for deep-blacks and wide-colour range for intense video performance. Moreover, it offers features dedicated to offer a premium 4K gaming experience. The incredibly fast 1ms grey-to-grey (GTG) response time on EL2870U ensures a much more responsive and fluent in-game experience than a traditional 4K television, particularly noticeable in first-person shooter games.

Bluetooth speaker

Taking portable entertainment to a whole new dimension

F&D has announced its portable Bluetooth speaker, W8. Stylish yet balanced with excellent sound, the speaker is compact enough to fit in the palm of your hand. It puts an audio-visual show, playing songs perfectly in sync with programmable LED lights. Extremely loud for its size, with six-hour playback time and 10-metre range, the speaker brings to fore amplified outdoor entertainment.

The ultra-portable speaker seamlessly pairs up with any mobile or Bluetooth device, bringing distortion-free music.

Adding to that, there is a built-in microphone that allows you to make and receive calls at the press of a button.

The speaker is compatible with micro-SD card/auxiliary inputs. It also comes with built-in FM, bringing the complete music experience.

Smartwatch

Integrating music and fitness

Garmin India, a unit of Garmin Ltd, has launched Vívoactive 3 music GPS smartwatch—an enhanced version of Vívoactive 3 GPS smartwatch. The elegantly designed fitness watch has on-device music storage for 500 songs that can be played directly from the watch using Bluetooth headphones and speakers, eliminating the need for carrying a smartphone. You can load the watch with music directly from a computer or access offline music streaming services.

The lightweight smartwatch with an ambidextrous design has strengthened glass lens that covers its full face. It allows you to create and download workout plans as per needs. The battery runs for 13 hours in GPS training mode, five hours in GPS mode with music playing and seven days in smartwatch mode. The fitness watch includes GPS, contact-less payments through Garmin Pay, a swim-safe build with 5ATM water rating, smart connectivity and access to Garmin Connect IQ app store (for customising the watch).
