

## Smart TV

Super slim design with Dolby surround sound

Noble Skido, a part of Veira Group, has unveiled its newest 140cm (55-inch) ultra-HD smart TV, featuring a high-performance engine, high-speed response, smart, multi-function versatility and more than 100,000 hours of inbuilt content. It is equipped with a super narrow bezel, along with 3840p x 2160p resolution. The anti-glare panel and dynamic contract ratio of 200000:1 gives in-depth colour reproduction and a comfortable viewing experience, rendering true-to-life HD images.

Engineered to deliver the most superior sound, the smart TV features five sound modes with bass and treble adjustment that allows you to experience even the faintest sounds clearly. It runs on Android and comes with pre-installed applications. Its Miracast feature allows you to cast your smart device's screen on the TV. Additionally, 1GB + 8GB RAM improves performance and buffering of TV while watching and streaming online or downloading apps. It supports a number of connectivity options including three HDMI inputs and two USB inputs. The TV also comes with a wireless keyboard for a smoother experience.

## Bluetooth headphones

For music and tech aficionados

Digitek has launched high-quality Bluetooth stereo headphones in three variants: DBH-005, DBH-011 and DBH-012. The headphones have been engineered to deliver the best acoustics and aesthetics. The devices offer excellent bass with life-like sound. The high-performance headphones can be used with ease while working out or while engaging in sports with wireless functionality.

All variants are equipped with control buttons for wireless operations and a built-in microphone that supports hands-free calling. These produce stereo effect with loud and clear sound. DBH-011 and DBH-012 variants are foldable, which makes these extremely handy and travel-friendly.

All versions can be used with soft ear pads to reduce noise. These provide excellent talk time performance and music playback for at least eight hours, with only two to three hours of battery charging through USB, and offer a standby time of 120 hours. The headphones have Bluetooth 4.2 + EDR implemented, making these compatible with most smartphones, iPads, MP3/MP4 players and laptops.

## Smart table lamp

Equipped with colour-changing technology

SYSKA LED has introduced Wi-Fi-enabled smart table lamp, which is compatible with Amazon Alexa. Once SYSKA smart table lamp syncs with Amazon Alexa, it can be controlled using voice commands.

The lamp comes with feather-touch controls to switch it on/off, control its colour temperature and its dimness (brightness) for a seamless experience. The two-mood settings in the lamp allows you to fix your lighting requirements between reading and night. The lamp is designed ergonomically as well as flexible to use. It can be bended up to certain extent to provide an effortless reading experience and cause less strain on your eyes.

SYSKA smart table lamp lasts up to 30,000 hours. It is equipped with colour-changing technology that allows it to change the colour of the lamp at three different temperatures: yellow, warm white and white. Colour temperature ranges from 3000k ~ 6000k.
