BSE launches Ask Motabhai chatbot

BSE in partnership with Microsoft and Shephertz has launched Ask Motabhai, an artificial intelligence (AI)-based chatbot, to provide on-demand data and information from the stock exchange's website. Ask Motabhai can have a text-based conversation with a user and mine BSE website to give customised information. The chatbot was built using Microsoft Bot Framework, Cognitive Services, QnA Maker and Language Understanding Intelligent Service on Microsoft Azure cloud.

Google launches Android 9.0 named Pie

Google has announced Pie as the name for the latest version of Android operating system, succeeding Android Oreo. Android 9.0 Pie version includes AI-powered adaptive battery system and navigation system featuring a single home button, among others. Google has begun rolling out this version to

Pixel phones and will roll it out to other devices later this year.

Siempo app addresses the issue of digital addiction

Siempo is an app that aims to un-addict users from their smartphones and its numerous attention-stealing apps. To do so, it replaces Android device's homescreen, while also taking advantage of a number of design principles to push distractions further away, and give them more control over the notifications.

Cx File Explorer simplifies browsing contents of a smartphone

Cx File Explorer comes with a clean interface, which aims to simplify the work of browsing through the contents of an Android phone. The app is segregated into three parts: Local for tracking app downloads and other storage-related works, Library for images, audio and documents, and Network for wirelessly transferring contents from phone to PC. In addition to this, the file manager has Analyzer feature for analysing and managing phone's storage from time to time.
