

port, which can be beneficial for sharing data from a common point across all devices connected to a network.

Many routers come with Quality of Service (QoS) feature, which allows you to prioritise data and resource usage. Most routers today are configurable using mobile applications.

Last, but not the least, look for deals that give maximum warranty.

Market options

Here are some latest Wi-Fi routers in the market today:

Netgear R6260. Netgear launched R6260 dual-band Wi-Fi router in April. Although a bit expensive, R6260 is great for usage in larger apartments or office floors. It provides a total speed up to 1600mbps with two antennae (300mbps + 1300mbps). An 880Mhz

Netgear R6260

processor powers connectivity using AC1600 Wi-Fi technology, that is, 802.11ac Wi-Fi standard, making it ideal for streaming multiple HD content simultaneously or playing high-end online games. R6260 comes with USB 2.0 port and DLNA support. It is available online for ₹ 4989.

TP-Link Archer C-1200. This offering by TP-Link is another popular dual-band market option. It comes with three external antennae that provide a total speed up to 1200mbps, distributed over 2.4GHz spectrum and 5.0Ghz band via 802.11ac standard. The device is suitable for large homes and offices

TP-Link Archer C1200

for data-intensive usage, and works well even through multiple walls and obstructions. It offers four Ethernet ports, one WAN port and one USB2.0 port. It is available online for ₹ 2749.

D-Link DIR-816. D-Link offers a budget-friendly dual-band 802.11ac router, DIR-816. It comes with three antennae and can deliver speed up to 750mbps. Supporting both WPA and WPA2 security and QoS feature, DIR-816 offers a large coverage range. It is a good option for daily home use.

D-Link DIR 816

It contains four Ethernet ports and one WAN slot. Available online for ₹ 1799, the router comes with three years warranty.

Mi 3c. The budget router, Mi 3c is a popular choice from 802.11n single-band segment. The device provides up to 300mbps speed and coverage up to 80 metres. It has four antennae—two dedicated for signal transmission

Mi 3c

and two for signal reception. There are two Ethernet ports and one WAN port. It can connect up to 64 devices simultaneously and provide 24 stable connections. It is priced at ₹ 999.

Tenda N301. Tenda N301 single-band router supports 802.11n wireless protocol. It has two omni-directional antennae of 5dBi. The router provides

Tenda N301

speed up to 300mbps and is suitable for moderate home usage. It features three Ethernet ports and one WAN port. It retails for ₹ 900 and is available on various online stores. **EFY**
