

Leading manufacturers of sensors for consumer electronics

- Accent Sensor Pvt Ltd
- AnaSem Hong Kong Ltd
- Denso
- FLIR Systems Japan K.K.
- Fujikura Ltd
- Honeywell
- Kingsway Technology Inc.
- NXP Semiconductors
- Reed Relays and Electronics India Ltd
- Sensors India
- Shenzhen Sunway Industry Co. Ltd
- STMicroelectronics
- TDK Corp.
- Xiaomi
- Zenthermik Sensing Technologies Pvt Ltd

can grant or deny access to visitors. Smart locks can also detect when you are nearby and unlock the doors.

Smart locks, like Schlage Sense, make life easier. Simply enter the access code to unlock the door instead of searching in your pockets for keys. Pairing the lock with your smartphone over Bluetooth is easy. It has built-in alarm sensors, and can sense potential attacks and issue alerts to you.

Some smart locks come with voice-operated features, too.

Automobiles. Modern vehicles are built with many sensors. As the technology advances, cars will be completely controlled by sensors and computer programs. Modern automobiles use controller area network (CAN) topology. CAN bus is designed to provide an efficient, reliable and economical link between various CAN stations, sensors and actuators.

Autonomous cars need hundreds of sensors including camera, radar and lidar. The global automotive sensor market, which features driver-assist features to entertainment systems, is projected to contribute billions of dollars in revenue. This is due to increasing demand of automotive sales along with proliferation of sensors in various applications, including MEMS sensors, artificial intelligence (AI) to safety and infotainment systems.

Wearable sensors. These are used in a variety of applications, from being incorporated into clothing or worn on

the body as implants or accessories. Common examples are smartwatches, activity trackers and health monitoring systems. Wearable devices are also used in defence, research and retail shops.

To sum up

The sensor market for consumer electronics is expected to reach billions of dollars by 2022. Growing demand for consumer electronics like smartphones, tablets, televisions and wearable devices are the key factors driving this growth. Demand for devices for multimedia, motion sensing, navigation, security, surveillance, healthcare and gaming may provide further growth avenues.

Countries such as India and China are expected to contribute significantly to the growth of the sensor market in the years to come. New developments in sensor technology, such as small size and lower power consumption, add more demand for consumer electronics and fuel the demand in the global sensor market. **EFY**

PROTOLAB

CAPACITIVE TOUCH

PROSENSE solutions

- SINGLE ELECTRODES
- MATRIX
- PROGRAMMABLE 120 KEYS
- SLIDER
- ROTARY
- 3D TOUCH
- WITH BACKLIT AND HAPTIC FEEDBACK

outputs

USB | PS 2 | I2C | SPI | RS 232

input output devices

switch solutions

Membrane Switches
Capacitive Touch
Vandal resistant Keyboards
Backlit Keypads
Programmable Keyboard (USB/PS2)
