

SOFTWARE For HEALTHCARE And DESIGN APPLICATIONS

FieldTrip

Visit: www.fieldtriptoolbox.org

Full version: Free

In medical electronics, FieldTrip can be used for advanced brain analysis methods like electro-encephalography (EEG) or magneto-encephalography (MEG). It is a MATLAB software toolbox developed by the research team at Donders Institute for Brain, Cognition and Behaviour in the Netherlands. The toolbox can monitor invasive electrophysiological data like time-frequency analysis, non-parametric statistical testing, source reconstruction and so on. FieldTrip toolbox is compatible with major MEG systems like CTF, Neuromag, Yokogawa and Ricoh, and popular EEG systems, too.

Rhythm

Visit: www.advancedmd.com

Full version: Paid

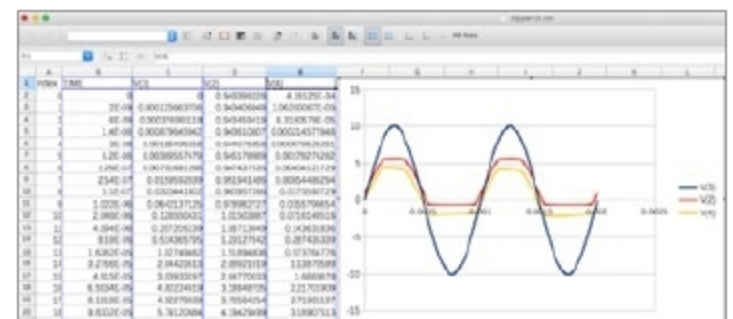

Rhythm, created by AdvancedMD, is a medical office management software. Main features of Rhythm include practice management, patient record and engagement, electronic prescription, telemedicine and so on. It can also help in room assignment and in advanced use cases like review analytics, financial analytics and more. It can be installed on Mac or Windows platforms. Users can also work on cellphones—only iOS systems are supported.

Xyce

Visit: <https://xyce.sandia.gov>

Full version: Free

For electronics circuit designers Xyce is a handy open source analogue circuit simulator. It is SPICE-compatible, high-performing and can help simulate large circuits through large-scale parallel computing platforms support. Xyce also accommodates serial execution across desktop platforms like Windows and MacOS, and smaller parallel executions on Unix-like systems. It can be used to monitor general network systems like neural networks or power grids, too.

GPUTILS

Visit: <https://gputils.sourceforge.io>

Full version: Free

This is a collection of tools for programming microchip programmable interface controller microcontrollers (MCUs). Main components of GPU-TILS are library gplib, linker gplink, assembler gpasm and disassembler. It is open source and is available under GNU public licence. It is supported on Windows, MacOS X and Linux.

Free Daily Utility Tools

Office tools: Apache OpenOffice (www.openoffice.org)

Zippping software: WinZip (www.winzip.com)

Browser: Mozilla Firefox (www.mozilla.org)

PDF Reader: Adobe Acrobat Reader DC (get.adobe.com)

Media player: PotPlayer (potplayer.daum.net)
