

Bluetooth earbuds

Featuring unique power management technology

Soundcore by Anker has unveiled Spirit and Spirit Pro earbuds, which are seamlessly comfortable, incredibly stylish and capable of delivering excellent sound quality. Spirit and Spirit Pro are engineered with a premium lithium-ion battery and exclusive power management technology. The ultra-efficient combination offers 8 to 10 hours of non-stop music.

Spirit's SweatGuard and IPX7 takes waterproof protection and ramps it up to ensure the earphones are protected with hardcore defence against sweat, water and other liquids, and with Spirit Pro's IP68 rated waterproof protection it adds an extra level of defence. The submarine-inspired structure and impermeable hydro-seal offer complete protection against water and the corrosive power of sweat and other liquids.

Both variants are built with high-quality metallic earbud casing and silicone accessories, besides the ultra-durable wire, making both of these an ideal gym companion.

Spirit's premium composite drivers are engineered to deliver crystal-clear sound with enhanced bass and soaring treble. Passive noise cancellation reduces ambient noise and allows users to focus entirely on the music. Also, the three-button remote in Spirit Pro allows them to switch between songs, or play and pause the playlist effortlessly.

Robot vacuum

Bringing a new level of intelligence and automation

iRobot has launched Roomba i7 + robot vacuum with Clean Base Automatic Dirt Disposal technology in India. Roomba i7 + brings a new level of intelligence and automation to robotic vacuum cleaners with the ability to learn, map and adapt to a home's floor plan. Introducing Imprint Smart Mapping, Roomba i7 + remembers multiple floor plans and room names so users can customise cleaning jobs and direct the robot to clean specific rooms by voice or via iRobot HOME app. When Roomba i7 + robot vacuum is finished cleaning, it empties its own dust bin into Clean Base, which holds 30 bins of dirt, allowing users to forget about vacuuming for weeks at a time. This enhances customer experience by eliminating the dusty and dirty mess often associated with emptying vacuum canisters.

Home security camera

With AI-powered motion detection

360 Smart AI has announced a vigilant smart home security camera that guards like the most competent steward of a home. With 1080p HD image sensor, the smart home security camera can output 1280 × 720p HD images. Encompassing wide-angle 110-degree, full-HD, full-panorama, the camera inspects every corner of the home. It comes with super-charged two-way audio for communication. Due to horizontal pan and tilt, users can remotely control the security

camera for any application. The device patrols every corner of the home and supports customised patrol points and inspects pre-set zones regularly.

With artificial intelligence (AI) visual algorithm in tracking watch mode, the camera automatically adjusts the viewing angle to track the trajectory of any in-breaking object, and five-seconds alarm video are sent to the synced phone app.

The camera can accurately identify humanoid changes, crying sound detection and abnormal sound/change monitoring, making it work as a smart baby monitor, too. Its HD infrared night vision captures clear images for up to a seven-metre range, no matter how dark.
