Google launches Bolo app to help children read

Google has launched a speech-based reading-tutor app called Bolo for Android-based smartphones to help children in rural India with their reading skills. The app is aimed at helping kids who are unable to go to schools or have no access to it. Bolo app can be downloaded for free from the Google's Play Store. The app can work offline and does not require an active Internet connection. Designed for primary-grade children, Bolo Android app helps improve both English and Hindi reading skills of kids by encouraging them to read aloud. The app also gives instant feedback.

CarveNiche, Microsoft team up for Maths learning program, beGalileo

CarveNiche Technologies has announced an agreement with Microsoft for its customisable Maths learning solution for students, called beGalileo. The solution allows students from classes I to X to learn Maths, using artificial intelligence (AI) to customise each student's pathway to learning. This also makes beGalileo India's first Maths learning program for K12 education to be available as a Windows App. beGalileo covers over 300 concepts in areas including numbers and operations, algebraic thinking, geometry, data handling and measurements. The platform continuously collects and analyses performance information and uses AI to dynamically serve each student,

supporting beginners to progress and providing challenging questions as the student advances. With the hosting on Microsoft Azure cloud, the solution can be easily accessed by students and schools, on any device, from anywhere in the world.

Childish Gambino, an AR app for devices with ARCore

Childish Gambino works with Google's Playground app to pop Donald Glover (otherwise known as Childish Gambino) into photos and selfies. Google has partnered with recording artist Childish Gambino for his Playmoji character. Childish Gambino's Playmoji can be augmented to photos and videos on Pixel smartphones. Google Pixel users can open Playground from the camera app and start using Childish Gambino Playmoji pack. They can pose with him using the selfie camera or drop him into the scene.

TextBlast app for sending bulk SMSes

TextBlast allows users to send individual text messages to a bunch of people. They can write out the message, select the contacts and then send each message. It lets them do things like subtly personalise invites for specific people, without dragging everybody into a massive group chat. In addition, it has uses for marketing and PR as well.

The prices, features and specifications are based on information provided to us, or as available on various websites and portals. EFY cannot vouch for their accuracy.

"Sir, I am tired of paying bribes to your office in cash. Kindly arrange for e-bribe facility."

"Don't teach me the workings of a wind power station. Just repair the rectifier and its switch gear. The noise is destroying the sea ecosystem."
