

that are caused due to the narrowing of blood vessels. Regular monitoring of the condition can help.

Emay ECG monitor. This product is a simple-to-use, one-touch device, as small as a cellphone. It can take readings from four areas of the body.

It has a rechargeable lithium battery with a life of up to 300 readings, and can be recharged with a computer or house current in two hours. A power indicator is present on the unit.

The device comes with 100 rhythm strips to take up to 100 readings. It does not require any connection with a smart device to get data—it immediately provides results on the device monitor. This product is available online for about ₹ 5000.

SanketLife Pocket 12-Lead ECG device. This device prepares ECG reports, calculates heart rate and HRV (heart rate variability), and provides users with cardiologist opinions

within 10 minutes. To get results, the device should be linked to SanketLife mobile app (available for Android and iOS). The device is leadless and can give results with one touch. It is approved by Central Drugs Standard Control Organization (CDSCO) as it provides 98 per cent accuracy. This

product is available online at a starting price of ₹ 6000.

Blood sugar monitors

There were nearly 73 million diabetics in India last year and the number is ever increasing. In the long run, diabetes can impact vision and harm kidneys, heart and the nervous system. Knowing that we cannot ignore diabetes, it is imperative to regularly check blood sugar levels. A portable blood sugar monitor at home can make that possible.

Accu-Chek Active blood glucose meter kit. The kit includes blood glucose meter, test strips, soft click lancing device and lancets—all basic components required to perform a

diabetes test at home. It can be purchased through any online or offline store. Prices vary based on the number of test strips and disposable lancets in the kit. This product is available online at a starting price of ₹ 1200.

Truworth G-30 Glucometer Blue Kit. This kit also includes all the basic components to perform the test. It can

be purchased online or from offline retail stores. You can send, store and analyse test results to the cloud after you connect the device to a smartphone or a computer using the cable. It is available online at a starting price of ₹ 700. **EFY**
