

strengthen communities,” said Yael Maguire, vice president of connectivity, Facebook. Facebook is working on this in collaboration with Qualcomm.

Qualcomm has introduced two new chipsets, namely, QCA64x8 and QCA64x1. It is the first company to come up with a 60GHz Wi-Fi solution with optimisations based on 802.11ay specification, enabling best-in-class 60GHz Wi-Fi speeds and unmatched coverage performance. The company has provided industry-first 802.11ay 60GHz Wi-Fi chipsets including QCA6438 and QCA6428 for infrastructure and fixed wireless access, and QCA6421 and QCA6431 for mobile applications.

60GHz Wi-Fi goes beyond high-performance throughput, as Qualcomm’s new chipsets enable unique always-on ambient feature. These provide Wi-Fi-sensing capabilities, enabling devices to identify people, objects, movements and precise locations without being affected by light. Networking and mobile devices alike can take advantage of this new Wi-Fi sensing feature

Terragraph network by Facebook

to provide new and differentiated experiences to end users.

## Advantages of the technology

Facebook’s Terragraph network will be constructed through the development of a multi-node wireless system based on QCA6438 and QCA6428 chipsets. Compared to 2.4GHz and 5GHz bands commonly used in Wi-Fi networks all over the world, millimetre-wave-based

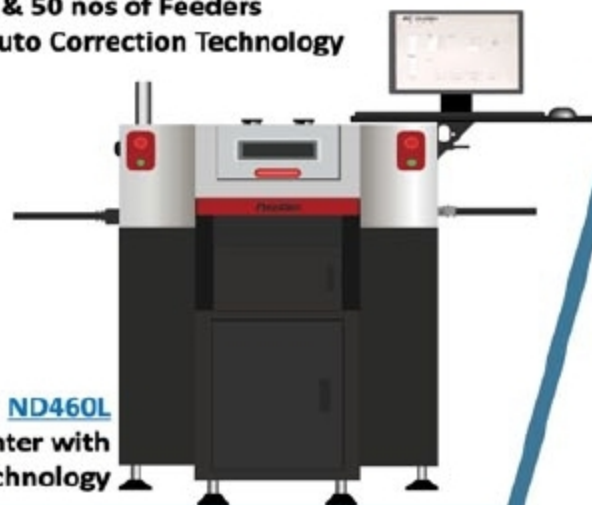

60GHz Wi-Fi offers a low-interference, bandwidth-rich spectrum that delivers increased wireless capacity and ultra-low latency.

With gigabits per second speeds, 60GHz Wi-Fi solutions provide wire-equivalent latencies, for experiences such as 4K streaming and truly immersive wireless virtual and augmented reality, all while significantly extending battery life. **EFY**

## AUTOMATIC SMT ASSEMBLY PROCESS *Solutions from ChipMax Designs Pvt. Ltd*

**NEODEN 4**  
TUV Approved SMT Pick & Place Machine with  
4 Heads & 50 nos of Feeders  
Vision Auto Correction Technology

**ND460L**  
High Speed LED & Driver Mounter with  
Fly Vision Auto Correction Technology

**NEODEN 7**

- ★ High Speed
- ★ High Precise
- ★ 6 Heads
- ★ Fly Vision
- ★ 64 Feeders
