BigMIND

Visit: www.zoolz.com
Full version: Paid

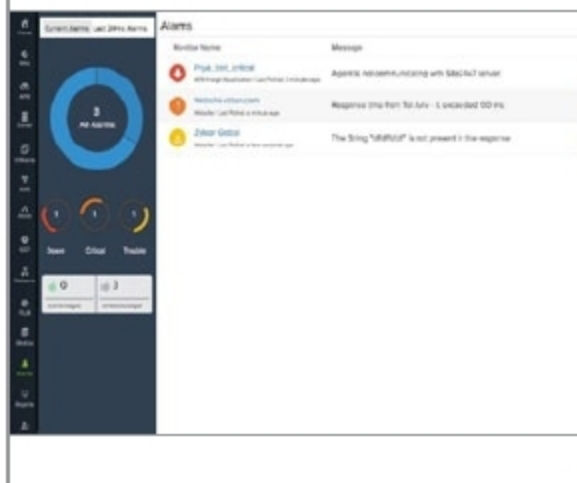

BigMIND by Zoolz is a cloud backup solution built completely on Amazon Web Services (AWS), which uses artificial intelligence (AI) to automatically store, organise and protect data. The installation and configuration are easy. The tribrid backup feature allows three types of storage, namely, local, instant and cold, to group data according to access needs. Whenever a user amends a file, it backs up only that portion, saving time. Other features include face recognition, object detection, optical character recognition (OCR), audio and video transcoding, and content search.

Site 24*7

Visit: www.site24x7.com
Full version: Paid; free trial

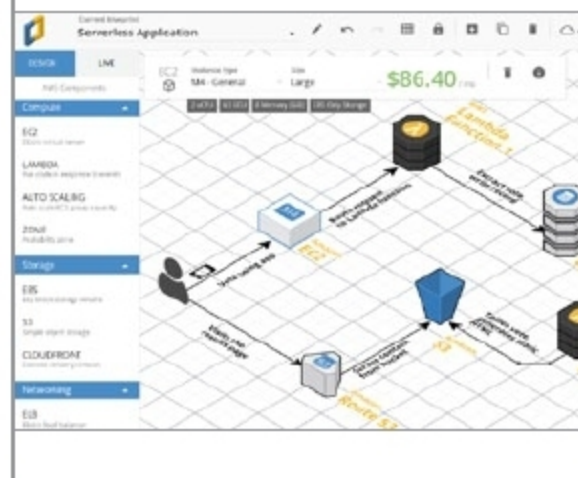

Site 24*7 is a powerful, secure and unified performance monitoring solution for Web infrastructure. It includes monitoring of websites, servers, synthetic Web transactions, applications for DevOps, networks and public as well as the private cloud. It also allows analysis of end-user experience through Real User Monitoring (RUM) feature. Status pages allow businesses to notify service status to customers. Searching and troubleshooting of issues are also possible using application logs across servers and data centre sites to ensure optimum performance.

Cloudcraft

Visit: <https://cloudcraft.co>
Full version: Paid

Cloudcraft is a cloud management software that allows users to design an advanced architecture diagram quickly using smart components for Amazon EC2, ELB, Lambda, DynamoDB, CloudFront, Route 53, etc. Documentation can be inserted directly in diagrams and AWS resources. The simple drag-and-drop user interface allows easy budgeting with Excel and CSV export. In the pro version, diagrams can be edited and shared online, or exported to docs, wikis and presentations. Using Live option it is possible to securely connect to cloud and display information such as health and status data.

360 Cloud Accounting

Visit: <http://360cloudaccounting.com/fr/home>
Full version: Paid

360 Cloud Accounting by 360 Business Ventures is an accounting software that enables users to manage accounting, projects and documentation on a single platform at any time, from any device in the world. The setup is easy and saves time by creating professionally designed customer invoices instantly. Importing and centralising of contacts is possible so that invoices, estimates and reminders for payments can be sent easily to customers. Other options include cash flow management, tracking vendor invoices, travel expenses integration and payment options.
