

Wireless mouse

Reduces noise by over ninety per cent compared to the traditional mouse

Rapoo has launched its silent mouse, M100, which gets all the work done without missing a beat or disturbing those around. The mouse brings the familiar click feeling, but without the annoying sound that bothers everyone around you. The ergonomically-shaped design and high-performance feet quietly glide over the desktop, with a smooth scroll wheel that completes the experience.

M100 intelligently connects to the working device. It simultaneously connects to up to three devices, and switches among them with ease. It simplifies complicated cross-platform use and meets multitasking requirements. The smart switch between Bluetooth 3.0, 4.0 and 2.4G ensures stable wireless transmission.

The 1300 DPI tracking improves speed, accuracy and reliability without the hassle of a clogged mouse ball. With Rapoo's energy-saving technology and power switch, the mouse can be used without power interruption for up to nine months.

Portable charger

Type-C power bank to support all devices

Anker has unveiled its first portable charger to support power delivery output with Powercore Speed 20000mah PD. PowerCore Speed PD series delivers unprecedented output for optimised charging. Type-C power bank supports and charges USB-C MacBooks and all other power delivery devices—a USB-C to lightning cable is required for iPhone 8.

The ultra-high capacity offers two-way fast charging and a conversion rate of more than ninety per cent, packs almost six phone charges, one MacBook charge and two iPad charges in the bag.

The device remains cool even under pressure due to its exclusive technology that controls the temperature when charging. If high temperatures are detected, it automatically modifies power output to reduce heat. Supporting multi-protect technology, the power bank always assures maximum user and device safety.

Wireless headset

With magnetic earbuds to prevent twirling

Toreto has strengthened its headsets lineup with BOLT, a magnetic Bluetooth wireless headset. Magnetic earbuds ensure the headset is secure and will not fall off while not in use. These also help the headset to remain tangle-free while tucked around the neck.

The headset is specifically designed to pep up the style quotient, delivering superior sound quality that elevates the audio listening experience. It can be used while travelling, cooking and working, among others.

With strong bass and HD sound, BOLT formulates the perfect amalgamation of style and technology. It takes just one hour to fully charge and lets the users enjoy six hours of uninterrupted music.

BOLT works equally well from a distance of ten metres. It can be connected to all kinds of smartphones, tablets and laptops using Bluetooth V4.2.
