Amazon enters edtech space

e-Commerce and tech giant Amazon forays into the edtech space with the launch of an IIT JEE preparation app called JEE Ready. The app, which is Amazon's first product in the edtech sector in India, has already been installed more than a thousand times. The test has been designed by experienced faculty members, and students can compare their scores against each other and keep a tab on their strengths and weaknesses. The app is currently in its beta phase and is available only on Android devices.

Online calculator that shows how trees can improve air quality and cut health costs

A new interactive online tool is set to encourage tree planting initiatives across the UK. It calculates how much pollution would be removed by planting trees in local areas as well as the corresponding public health cost savings. With hundreds of thousands of trees due to be planted across the country over the next three years in government-backed schemes, the new tool—Pollution Removal by Vegetation—takes national data and makes it locally relevant and accessible for councils, NGOs, developers and other businesses that are considering such initiatives.

AR goggles FORM is like Google Glass, but for swimming

The rise of augmented reality (AR) has enabled tech companies to create some of the most hyped-up eyewear the world has ever seen. Vancouver-based startup FORM has unveiled a pair of premium swim goggles that have AR integrated into the lens and an onboard computer that uses artificial intelligence (AI) to track metrics. The wearable gadget makes the underwater activity more visually engaging and enables users to maintain good form while tracking what is happening inside their bodies.

VR app that gives students a new way to see inner workings of cells

An educational app created at University of Alberta is giving cell biology students a brand new perspective on their subject, and may also offer a glimpse into the not-so-distant future of post-secondary education. Cell 101 VR (virtual reality) app shows students a VR perspective of the inner workings of cells and their interactions, allowing them to visualise cell biology in a way they never could before.

The prices, features and specifications are based on information provided to us, or as available on various websites and portals. EFY cannot vouch for their accuracy.

"Unfortunately, there is yet another ordinary landline call for you in this age of cellphones."

"What an e-friendly wedding—Bluetooth-operated music, virtual reality shows and blessings for the couple via video-conferencing!"
