

TRAI wants to become India's data leader

Telecom Regulatory Authority of India (TRAI) has expressed interest in being the country's data czar but Ministry of Electronics and Information Technology (MeitY) does not seem too keen about this. According to an English daily, a senior MeitY official rejected this view, saying the proposed Personal Data Protection (PDP) bill envisages the data regulator as a much stronger and bigger body, with much more powers and different areas of responsibilities.

Telangana government to invest ₹ 3 billion for the second phase of T-Hub

The Telangana government aims to turn T-Hub into the largest tech incubator in the world. "The government will be investing five times what it initially invested in T-Hub, in the second phase. This will be roughly three billion rupees," said Jayesh Ranjan, principal secretary, government of Telangana, at the HSX-2019, a national startup conclave held at IIIT campus in Hyderabad.

Government targets ₹ 3 trillion turnover at CSCs

Enthusied by the performance of common service centres (CSCs), the government has asked village-level entrepreneurs (VLEs) to aim for a turnover of three trillion rupees in the next five years, from around 700 billion rupees now, reported *The Hindu Business Line*. CSCs, which have increased from around 83,000 in 2014 to 360,000 now across India, act as access points for delivery of various services.

brands and 52 per cent of LED downlighter brands across 400 electrical retail outlets were found to be non-compliant with consumer safety standards as prescribed and mandated for lighting products by Bureau of Indian Standards (BIS) and Ministry of Electronics and Information Technology (MeitY). These spurious products are a safety hazard for consumers besides causing significant loss in tax revenues, as these are illegally manufactured and sold.

In LED bulb category, Hyderabad had the highest non-compliance to BIS at 57 per cent, and Ahmedabad at 60 per cent had the highest non-compliance levels in legal metrology.

In LED downlighter category, Bareilly had the highest non-compliance to BIS at 78 per cent, and Mumbai topped in non-compliance in legal metrology at 78 per cent.

As per this study, more than half of the LED bulb brands surveyed in the national capital (52 per cent) did not conform to BIS standards (absence of the BIS mark), and the same was the case with LED downlighters (58 per cent).

Thirty-six per cent of the LED bulb brands and 58 per cent of LED downlighter brands surveyed did not follow legal metrology guidelines in the national capital.

Samsung keen to bring more connected devices to India

South Korean tech giant Samsung is betting big on the Internet of Things (IoT) technology gaining pace in India to roll out more connected appliances in the country. The company, which already sells smart refrigerators and washing machines in India, also expects the demand for such Internet-connected appliances to grow as 5G is rolled out going forward.

Samsung vice president - home IoT, Sunggy Koo told *PTI*, "Our focus is on ensuring a better IoT experience for consumers globally. Our smart products have received a strong response in the Indian market. We think usage of the IoT and demand for connected devices will definitely increase in countries like India as 5G gets rolled out."

Koo added that Samsung is working with various software and hardware companies to build its connected home ecosystem.

The IoT refers to a network of interconnected sensors and devices like smartphones, connected vehicles and appliances that harness information from massive amounts of data collected.
