Wireless power bank

A wireless as well as wired solution for charging on-the-go

STM Goods has announced the availability of STM Wireless PowerBank in India. The wireless power bank is compatible with wireless-charging-enabled models of iPhone, Samsung or any other Qi-enabled device. The unit also features a standard USB A port to charge other digital devices with the cable. A key innovative feature is availability of suction cups on the product that attach the power bank to the device for added portability.

The 10,000mAH wireless power bank includes a micro-USB cable for charging. Its unique ChargePlus feature reduces the charging time, ensuring that digital gear is always good to go.

Instant smart camera

A camera that is also a printer

Fujifilm India has launched the first-ever hybrid instant smart camera, instax mini LiPlay, in India. LiPlay boasts of such cutting-edge features as LCD display screen and wireless connectivity that enables printing of photos shot with a smartphone as well.

LiPlay allows reviewing photos captured on the device via the LCD monitor on the back and choosing images to print. The camera comes packed with such features as Sound Record, which can be used to record up to ten seconds of audio, which can then be printed along with the photo in the form of a QR code.

Another exciting feature of LiPlay is Direct Print, which allows printing of an image from a smartphone on an instax mini film, thereby enriching the moment by creating a tangible photo-sharing experience. Remote Shooting function releases the shutter while standing away from the camera.
