

Wireless charging pad

Compatible with all Qi-enabled smartphones

The ten-watt BOOST↑UP wireless charging pad by Belkin is optimised to deliver fast wireless charging. It is engineered to work with lightweight plastic cases up to three millimetres thick. A white LED light indicates that the phone is properly aligned and charging, while an amber light alerts the user of the presence of a foreign object. The light is specially designed to ensure it does not disrupt the surrounding environment.

Sound bars

With built-in Alexa voice control

Yamaha Music India, a subsidiary of Yamaha Corp., has introduced two sound bars, with built-in Alexa voice control, in India—YAS 109 and YAS 209. The sound bars offer enhanced music playback capabilities, featuring Wi-Fi connectivity to play tunes through Spotify Connect, Amazon Music and Alexa-supported music services. Aesthetically, both models boast a fresh, ultra-slim design for movie and music enthusiasts to discreetly place these in front of their TV or mount on the wall without the need of an additional bracket.

YAS 109 features built-in sub-woofers that deliver rich and deep bass in a compact size, while YAS 209 includes a separate wireless sub-woofer, providing flexible placement options and even more expressive bass. The built-in Alexa feature provides volume-lowering capabilities, which automatically decreases the volume of movies or music to help receive a voice command. The remote contains a dedicated button to initiate Alexa control. Additionally, Alexa can be muted, when desired, or turned off completely when the sound bar is powered down, based on user preferences.

The sound bars incorporate Dolby Digital and DTS Digital Surround decoding, as well as DTS Virtual:X for immersive, virtual 3D surround sound. Both sound bars feature Yamaha Clear Voice technology, which improves audibility and clarity of dialogue in movies and TV shows while maintaining overall sonic quality.

Wireless neckbands

Built to ensure a stable wireless connection

Flybot has launched its range of wireless neckbands in India. The two variants, Flybot Blaze and Flybot Action, come with Bluetooth v4.2 and pack battery backups of 135mAh and 100mAh, respectively.

Blaze promises ten hours of listening time, while Action offers four hours of playtime on full charge. Both neckbands offer connectivity up to ten metres. The wireless neckbands come with eleven-millimetre drivers to offer powerful and dynamic bass.

Engineered for superior sound, Flybot wireless neckbands bring together unique technological features to deliver best-in-class quality for voice and music. These are built to deliver top-notch call and command (voice) quality.
