LED TV

With enhanced picture quality and inbuilt box speaker

Daiwa TV expands its portfolio with its recent 98cm (40-inch), D40B10 LED TV. It comes with heaps of functionalities, easy-to-use interface and future slim technology at a challenging price. The full-HD LED TV features wireless headphone control. Additionally, its Eco Vision feature helps reduce power consumption for enhanced contrast and on-screen noise. With a screen resolution of HD 1366x768 pixels, users can enjoy the magic of cinema directly at their home.

The smart TV comes with detailed picture quality with an A+ grade panel and 16.7 million display colours, which make every picture stand out. Further, it comes with features like multi-display function, cinema zoom, image freeze, 3D comb filter and picture enhancement that further enhance picture quality.

The power audio volume system, integrated with 20W box speaker, delivers top-notch audio output. Users can adjust the bass, treble and volume using the equaliser. With the presence of several connectivity options including two HDMI input ports and two USB ports, the smart TV enables them to connect to multiple media devices.

Earbuds

Developed for Nintendo Switch and mobile gamers

HyperX, the gaming division of Kingston Technology, has launched its HyperX Cloud earbuds in India. Developed for Nintendo Switch and mobile gamers, Cloud earbuds feature signature HyperX comfort coupled with patent-pending HyperX designed soft silicone ear tips, giving gamers the ultimate in comfort and superior sound for an immersive gaming experience on-the-go.

HyperX Cloud earbuds offer rich sound quality with high-fidelity-capable 14mm drivers to deliver clear low, mid and high tones with enhanced bass and ambiance for a captivating gaming experience. The earbuds include a rubberised, tangle-free cable connection that features a 90-degree-angled plug, optimised for handheld mode.

These also offer direct connectivity for voice chat functionality supporting Nintendo Switch with a slim inline mic. For added mobile convenience, the mic can also be used for calls, with convenient single-button control for calls and media streaming.

The earbuds are compatible with Nintendo Switch as well as smartphones and tablets with 3.5mm CTIA standard connectors.

Broadband router

A wireless router that offers concurrent users connectivity without interruption

DIGISOL Systems debuts the next-generation wireless router—DG-BR5411QAC—that operates on both 2.4GHz and 5GHz (dual band) along with a transmission speed of up to 1200Mbps. Equipped with the next-generation Wi-Fi standard IEEE 802.11ac, the wireless router facilitates seamless surfing and file sharing (such as HD video, movies, music and documents).

The device uses intelligent antenna technology to transmit multiple streams of data, which enables users to receive wireless signals faster at home.

Suitable for homes and small offices, the powerful bandwidth of the router can cover large areas, allowing more devices to connect to the network. The dual-band router features quality of service (QoS) prioritisation technology that analyses and separates multiple data streams based on sensitivity to delay, enabling multiple applications to stream smoothly across the network. DG-BR5411QAC supports wireless 802.11b/g/n and security protocols like WEP, WPA and WPA2.
