Crypto News, a news aggregator about cryptocurrency, mining and blockchain

Crypto News app aggregates the most important and breaking news from relevant websites such as Cointelegraph or Coindesk, Forklog, Bit Media and others. This list is constantly revised and updated with new resources. Push notifications help users get instant access to essential information like Bitcoin news update or another data concerning blockchain technologies. The app lets them be aware of the rises and downfalls of cryptocurrencies, within the app. It also shows the exchange rates for popular cryptocurrency in live mode.

Redd Bricks, a project tracking and communication app for the real estate industry

UX design agency Redd Experience Design has launched Redd Bricks (beta version), a project tracking and communication application for real-estate developers, builders, contractors, architects and others in the construction industry. The app will help service providers in the segment gain an edge over their competition by integrating their customers and simplifying the decision-making process. This will speed up overall construction, enabling on-time delivery and maintaining brand promise.

RCS Business Messaging revolutionising the future of communication in business

RCS Business Messaging is a communication protocol between telecom operators, original equipment manufacturers and messaging partners for application-to-person (A2P) rich messaging. It equips brands to send videos, audios, images, gifs, map locations and deep link to specific actions, to create engaging and rewarding campaigns. It provides them with the opportunity to increase their engagement with customers by making use of business messaging using chatbots and artificial intelligence (AI).

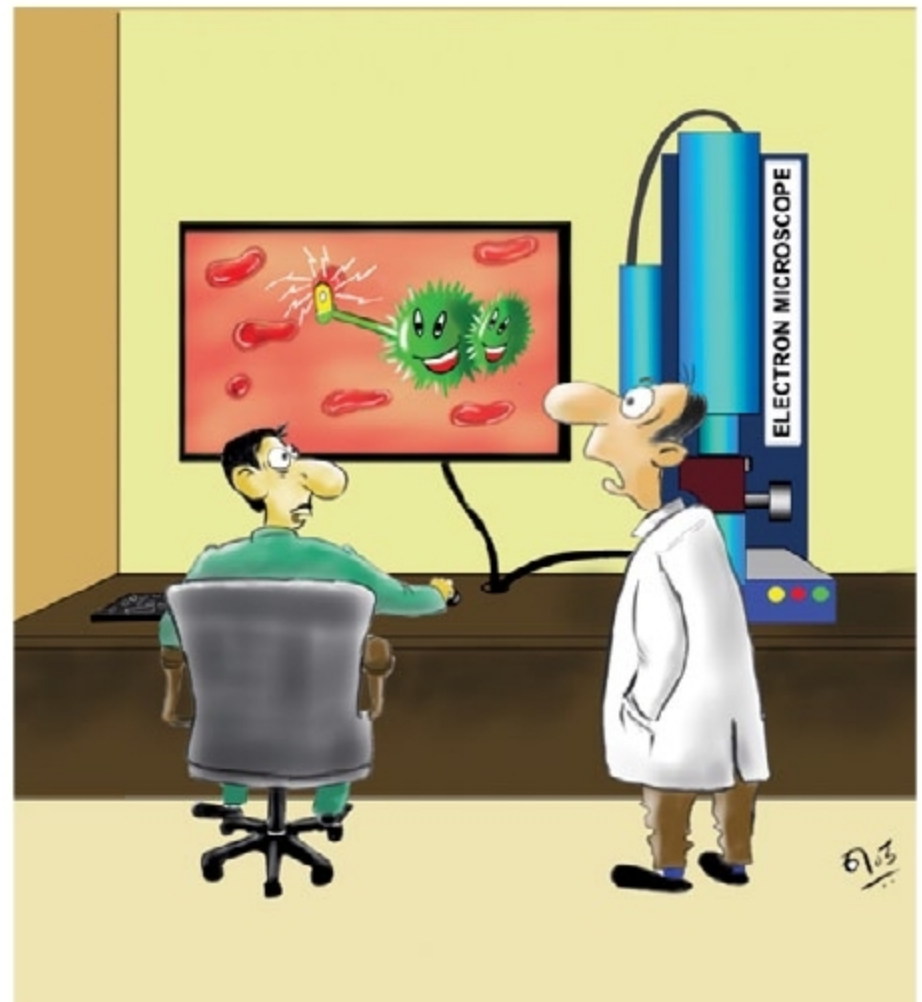

myViewBoard, a digital whiteboard in the cloud

ViewSonic Corp. introduced ViewSonic myViewBoard solution. To address limited content forms, layout and interactive distance associated with traditional whiteboards, ViewSonic myViewBoard provides multiple users a wide array of annotating pens, painting tools, sticky notes and media file types on unlimited pages to enable engaging content creation. It works on interactive flat panels, such as ViewSonic ViewBoard, and mobile devices to merge the physical and virtual space with on-site touch and online interactive technologies.
