

## Personal robot

### India's first companion robot for kids

To empower a child's development, Indian consumer electronics startup emotix has unveiled Miko 2, a personal robot for children. The robot aims to help modern parents in early education and development of their kid(s) by engaging them in playful learning.

Miko 2 can initiate and hold long conversations with a child, imparting knowledge based on academic curriculum and general facts about the world.

The system is powered by a proprietary emotional intelligence engine developed inhouse by emotix. It enables the robot to not only identify and remember the child's moods but also adapt to his or her personality.

Miko 2 can see, hear, sense, express, talk, recognise faces, remember names, identify moods, initiate a conversation and learn from its own environment to intuitively develop a bond with the child. It sports an HD camera for face recognition, can hear through active noise-cancellation microphones and has edge sensors that save it from falling off edges such as tables and stairs. It comes with time-of-flight sensor that enables it to better sense its surroundings and make decisions accordingly.

Specially-designed games, riddles, fun facts, rhymes besides music and dance that impart playful learning for the child are available with the product. Miko 2's parental control dashboard helps track and guide the child's interactions with the robot. TeleConnect feature allows parents to do video-calling on wheels through Miko 2 from any corner of the world.

## Fitness tracker

### Designed exclusively for women

MevoFit has launched two women's only fitness trackers, namely, MevoFit Slim and MevoFit Slim + HR. The MevoFit Slim series has been designed to bring alive holistic fitness aspirations of women while complimenting their looks.

MevoFit Slim is IP67 water-resistant and has 2.2cm (0.87-inches) OLED customisable touchscreen with a brilliant display. Users can customise clock faces as per their taste and moods. Battery life of more than seven days delivers a consistent performance and makes it a reliable tracking partner for women fitness enthusiasts.

The band comes with a period tracker, ovulation tracker and coach feature for new moms, providing an independent approach to their life even while managing their daily chores. While the period tracker warns them about emotional shifts, the ovulation tracker helps them plan for their family. The coaching feature for new moms provides special assignments and tips by fitness experts, dieticians and trainers to help them get back in shape, by taking care of their nutritional needs as well. An inbuilt tracker keeps tabs on steps taken, calories burned, distance covered, sleep details and multiple sports.

MevoFit Slim + HR also features an inbuilt optical heartbeat sensor, which can further trace users' pulse with historical records.

## Solid-state drive

### Equipped with new-generation 3D NAND flash and 10 times faster boot-up time

iBall enters a new category of storage space with solid-state drives (SSDs). It has launched Phantom 6.4cm (2.5-inch) SSD, giving users incredibly smooth experience with high-speed storage. Bringing seamless data transfer, reduced loading time and faster boot up, iBall Phantom SSD enhances work productivity.

Bringing true power, the SSD gives 10 times faster boot-up time, shutdowns and application response. The bootup drastically reduces loading time and ensures seamless transitions and transfer times, as compared to conventional hard drives, making it more reliable and durable. Being shock-proof and vibration-proof with no moving parts, the SSD is armed with trim command, error correction code, raid capability and smart system to ensure data transmission performance and reliability.

The SSD comes with read speed up to 500MB, write speed up to 430MB for 120GB and up to 500MBps for 240GB and 480GB, making it ideal for desktops and notebooks.
