

SOFTWARE FOR **SECURITY**

iSpy

Visit: www.ispyconnect.com

Full version: Paid

iSpy is an open source video surveillance and security software. Some key features include motion detection, remote access, password protection, desktop recording, cloud uploading, Secure File Transfer Protocol (SFTP), and SMS and email alerts. Using Web interface iSpyConnect, multiple computers can be connected to one online account with a Web-based management interface. An iSpyConnect subscription gives the users access to remote services, alerts, remote commands and the full feature set of the Web side of iSpy. A check on CPU performance is essential for adding a large number of cameras and microphones to prevent the computer from crashing. The software is compatible with Windows-based PCs only.

Malwarebytes

Visit: www.malwarebytes.com

Full version: Paid

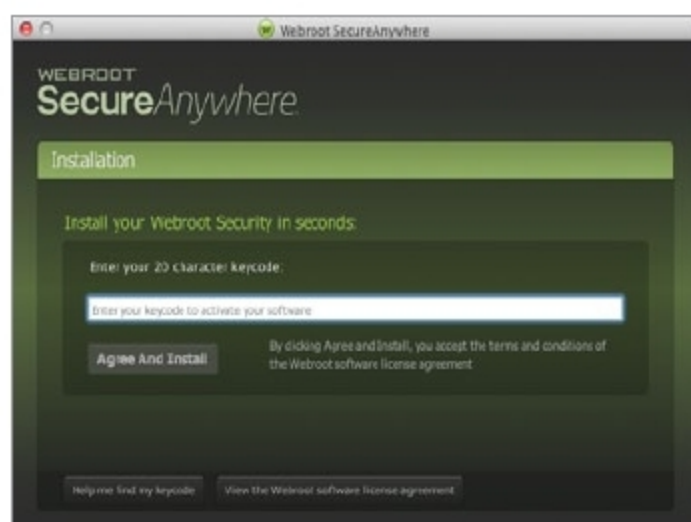

Malwarebytes Endpoint Security uses artificial intelligence (AI)-powered technology to prevent all kinds of cyber threats for both homes and businesses. It is easy to install. Scans are fast and utilise a few resources when running on the system. It has immediate remediation capabilities to minimise the impact on the end user in case of an infection. The centralised management console provides consolidated threat views and reporting. Other features include payload analysis, two-factor authentication and Web traffic reporting.

GPSWOX

Visit: www.gpswox.com

Full version: Paid; free trial

GPSWOX is a Global Positioning System (GPS) tracking and fleet management software for personal and business use. It allows users to track the location of objects in real time and get reports on such information as speed, exact address, petrol consumption, travel history, etc. Instant alerts are sent to iPhones, Android or Windows devices, via email, app or SMS. Additional features include geofencing and POI (Points of Interest) tool. It supports more than thirty languages. Business version (White Label) is compatible with more than 900 GPS tracking devices.

SecureAnywhere

Visit: www.webroot.com/in/en/home

Full version: Paid

SecureAnywhere Internet Security Complete edition is a family pack that offers protection from viruses, spyware and phishing. Along with a firewall for safe Web searching, it also has a password management feature and protection for mobile devices. It has a fast scan feature and requires a small amount of disk space. The system cleaner removes traces of Internet activity. If an important message requires user attention, Webroot icon on the system turns yellow or red. Secure online storage of 25GB is provided as a backup option. Additional features are available for backing up and synchronising user data.
