## Projectors

For the home cinema and sports segment

BenQ has launched two new 4K home projectors, W1700M, which is an upgrade of its home cinema projector BenQ W1700, and TK800M, which is an upgrade of TK800 sports projector.

Producing 4K UHD 3840x2160 resolution with 8.3 million distinct pixels for each frame, W1700M applies new-generation, single-DMD DLP technology to minimise the projector's profile, creating a sleek, compact design for modern lifestyles. W1700M utilises exclusive CinematicColor technology and delivers hundred per cent precise colour. In addition, W1700M, supercharged by HDR10 and HLG (Hybrid Log-Gamma) support, offers incredible visuals whether users are blasting through a Blu-ray movie or streaming content on popular platforms.

TK800M upgraded its colour range, which conveys stunning colour performance while balancing vivid colour and brightness for well-lit environments. Applying 3000lm high

brightness, TK800M perfectly delivers 4K UHD 8.3-million-pixel pictures in any lighting environment. Customised football and sport modes with powerful sound allows users to fully enjoy sports games.

## Smart car charger

India's first Alexa-enabled smart car charger

Roav, by Anker Innovations, enters the Indian market with the launch of India's first Alexa-enabled car charger, Viva Pro. The charger comes equipped with voice-controlled navigation to allow Alexa to get directions while driving.

A user can plug Roav Viva Pro into the cigarette lighter in the car, download the app (Android and iOS) and it is ready to go! Viva Pro gives the user four options for streaming audio from a phone to the car's stereo: Bluetooth, USB, aux cable and FM radio. The charger also comes with dual USB ports that deliver high-speed charging with Power IQ technology to the driver and passenger(s).

The smart charger supports two integrated microphones that accurately relay every word to Alexa, equipped with acoustic echo cancellation technology that delivers noise cancellation and accurate voice identification. Viva Pro can hear both the driver and passenger's voice clearly, even when music is playing. A blue LED ring around the top of the device lights up when it is listening. On the top of the device is a large button that mutes the microphone—the LED turns red when the mic is off.

Supporting multi-connectivity options, Viva Pro can be used in virtually any car, connecting via Bluetooth, CarPlay, Android Auto, aux-out or FM transmission.

## Wireless earbuds

Audio experience with a whole new level of freedom

Skullcandy has introduced the latest addition to its wireless line up, Indy, earbuds for consumers who want to experience audio with a whole new level of freedom. Indy gives users a wireless experience that is intuitive, durable and will last with them throughout the day.

Indy delivers a seamless, untangled experience with quick pair and capacitive touch controls, while its form factor provides a noise isolating fit, so users do not miss a beat of its rich sound profile. Removable stability gels and gel tips are also included to ensure a secure fit all day long. The earbuds feature a 10.06m (33-feet) Bluetooth range and a battery life boasting four hours in each bud and twelve hours in the pocket-sized charging case, providing a total sixteen hours of battery life.
