

LED gaming keyboard

Built for core and colourful PC gaming as well as normal desktop PC use

Astrum has introduced LED gaming keyboard KL560, featuring rainbow backlight colours. Astrum KL560 comes with nineteen anti-ghosting keys, liquid silicone construction and multi-colour light show, enhancing the gaming experience to the next level.

The spill-resistant technology and design make the keyboard safer during those exciting moments of gaming with a drink in hand.

Beneath the suspended keycaps, the multicolour LED backlight illuminates each key with three adjustable brightness levels for seven customisation modes. The keyboard with quality mechanical switches offers faster and near-instant responsiveness, smoothening gaming mode.

The keyboard with the unique brightness adjusting technology, offers a dramatic animation and pre-set lighting effects. It also features adjustable height and all key enable/disable functionality, along with braided cable and a USB connector. The 1.5-metre cable length enables the user to play games from a distance.

Power bank

With built-in micro-USB and Type C cables

Pebble has launched Ace 10,000mAh, an ultra-slim power bank. Ace promises to ditch additional cables, thanks to inbuilt micro-USB and Type C cables on both sides, along with Type C input port that ensures two-times faster juice up to devices.

Price
₹ 2299

Equipped with USB Type C port, the power bank can recharge the device itself, and coupled with micro-USB input, it fully charges even faster. Engineered with cutting-edge technology, Ace features grade A+ high-density 10,000mAh lithium-polymer battery capacity. The power bank supports an advanced ten-way circuit protection system that upholds against overcharging and short-circuits, keeping the devices safe at all times.

Bluetooth speaker

With the capability to withstand even complete submersion in water

After the successful launch of Flare speaker, Soundcore by Anker has announced its second edition, Flare +. The speaker brings powerful 360-degree sound, elevated to new levels by quad drivers, dual passive radiators and an intensified beat-driven light show.

Flare + delivers sound in every corner of the room using back-to-back, full-range drivers, two tweeters and dual bass radiators. Users can enjoy high frequencies with rich detail and clarity, smooth mids and a low end that pounds with electrifying power. To produce depth and clarity, Flare + utilises the exclusive Bass Up technology, which enhances the music's bass frequencies in real time, intensifying sound via state-of-the-art neodymium drivers.

Price
₹ 9499

Users can instantly double the sound by pairing two Flare + speakers to a single device. Boost mode further synchronises playback for twice the volume, while stereo mode separates left and right channels to expand the soundstage to deliver true-to-life performance.

The speaker's 6700mAh battery promises twenty-hour playtime on a single charge. Additionally, if the connected phone cannot keep up, users can charge it while they play via the built-in USB port. Flare + comes with IPX7 protection that withstands spills, rain and even complete submersion in water.
