

door using a 9V battery or a mechanical key. The lock is automatically unlocked from the inside with the lever handle to strengthen security. Installation is suitable for 35mm to 55mm wooden doors. It is priced at ₹ 9999 online.

IPSA Series-20. It offers a smart touch keypad and a capacity of eight passwords. An indication is provided in case of low battery and/or an emergency, and you can use the provided power system. The door is automatically unlocked whenever the inner lever handle is used.

The lock can be turned to security (master) mode so that the master can delete each registered user, while normal mode can control all users at one time to strengthen the security for a multi-user environment.

Other features include alarm and anti-panic egress in case of an emergency. It is priced at ₹ 7990.

Door answering machines

Installation of a smart lock is not enough when it comes to security. The lock will tell you if someone's near your home but a door answering machine will tell you who it is. A smart doorbell can be operated remotely from anywhere, while a video door phone achieves two-way hands-free intercom through a screen installed inside your home.

Some important features are described below.

Weatherproof. As a door answering machine is to be installed at the door, you should make sure that the equipment can withstand different weather conditions. Most doorbells are waterproof to ensure that these do not become defective during rainy season.

Home automation. To function remotely, smart doorbells are compatible with different smart home environments such as Amazon Alexa and Samsung SmartThings. Ensure to check compatibility before installation.

Smart monitoring. The main function of a smart doorbell is to know who is outside. A standard resolution camera and night vision is essential for security in both day and night times. Features like two-way audio and video-conferencing enable you to talk to the visitor remotely from anywhere.

Power. Power consumption should be low for a longer battery life. Most doorbells use batteries that have a voltage of 3.7V and capacity between 1800mAh and 3500mAh. These are lithium-ion rechargeable batteries.

Market options

With the rapid growth of home automation, there are a variety of choices available in the market. Some of these are discussed here. Prices mentioned may vary on different e-commerce websites.

Dolphigo doorbell. It is a smart Wi-Fi video doorbell by Vicom that comes with a music box. It has a 1.3MP HD camera and two-way audio. Bluetooth ensures fast, efficient and stable connection. The device is waterproof and suited for low power consumption. It comes with a rechargeable battery. It supports night vision and is compatible with Amazon Alexa.

Other options include voicemail, group chat and free cloud storage for thirty days. Some models have a remote unlocking function as well. It is available for ₹ 5990.

CP-PVK-70H video door phone. It allows monitoring of two outdoor stations with up to four indoor monitors. It has a complementary metal oxide semiconductor (CMOS) HD camera and an infrared (IR) colour camera. It supports night vision and has a weather/vandal-proof outdoor unit. Installation is simple and you can call between the extension units.

Other features include hands-free visitor calling, video intercom and unlock monitor. It is priced at ₹ 5125.

LeTouch doorbell. It is a smart wireless Wi-Fi video doorbell by LeTouch. It has an HD camera with a wide view angle and two-way audio. It is waterproof and is suited for ultra-low power consumption. It supports night vision and 2.4GHz Wi-Fi connection.

Other features include passive IR (PIR) motion detection, remote active wakeup and automatic switching between day and night. It is available for ₹ 2669. **EFY**
