10W ULTRA-COMPACT POWER MODULES

(10M03/10M05/10M09/10M12/10M24)

The 10W ultra-small series power supply module is a small volume, high efficiency power module. It has the advantage of global input voltage range, low temperature rise, low power consumption, high efficiency, high reliability, high security isolation etc.

Application : In smart home, automation control, communication equipment, instruments and other industries.
