

We Make Instruments Brighter

Dear Esteem Customer's:

This Milestone provides us an opportunity to reflect on our past and look forward to our future, as we celebrate 25 successful years in Electronic Industry. We extend "THANK YOU" to all our valued clients. We have reached this milestone due to your support and timely feedback. We acknowledge your patronage and confidence in Alfa Electronic Components.

CUSTOMISED LED & LCD DISPLAY

Temperature Calibrator

Digital Hand-Held Temperature Calibrator is one of the classic product of Questcont Technology. An instrument with high accuracy and precision, developed after years of research and development. Highest standard of technology incorporated in designing and firmware development. The performance is at par with high level devices available in the market. Instrument is capable of simulating almost all type of RTDs and Thermocouples. In addition device can source millivolt and simulate resistance. Device works on rechargeable battery which provides . 86 Hrs. of operation.

Current & Voltage Calibrator

Digital Voltage (Model : 440) and current 4-20mA (Model : 441) calibrator is an ideal tool for factory calibration of process instruments. Device with adjustable settings, suitable for fast calibration. Through suitable coarse and fine key, provides easy and speedy linearity check of instrument to be calibrated.

Process Calibrator

Digital 0-24mA and 0-20.5V simultaneous output (Model : 442) , 0-24mA simultaneous source and measure (Model : 443) calibrator is an ideal tool for factory calibration of process instruments. Device with adjustable settings, suitable for fast calibration. Through suitable coarse and fine key, provides easy and speedy linearity check of instrument to be calibrated.

Enclosure

• 36x60x75 • 48x48x85 • 48x96x75 • 72x72x50
• 72x72x75 • 96x96x40 • 96x96x50

JUMBO Display with PCB

Size : 5.0", 6.0", 8.0",
10.0", 12.0", 16.0" & 20.0"
