SANI THEO

Are you afraid of artificial intelligence (AI)? Tesla and SpaceX boss Elon Musk has said that AI is more dangerous than

nuclear warheads. Russian President Vladimir Putin has opined that the nation that leads in AI technology will be the ruler of the world. Currently, AI is a two-horse race between China and the US. China is on a mis-

sion to be the world leader in AI by 2030. In this article we walk through some facts on the latest AI developments related to military and defence applications. But before delving into these facts, let us first scan through
