

Smart LED TV

With quantum backlit technology

JVC has extended its Quantum TVs range with 4K UHD smart LED TV. The LED TV is a high-contrast TV with 109cm display size, which makes the images powerful and sharp, adding to the minimalist look of the TV. With a resolution of 3840x2160p, the TV promises more depth in every picture.

The TV is packed with powerful Dolby-certified speakers (20W + 20W) to ensure an enthralling aural experience. It features an inbuilt soundbar with a front-firing direct-to-hear sound technology. The TV is powered with quad-core 1.5GHz processor and Mali 450 quad-core processor for impressive and uninterrupted performance. The 8GB inbuilt memory and 1GB of RAM ensure that the TV operates smoothly without lag.

Equipped with a smooth and intelligent user interface, Sensywall, the TV enables the user to view more than thirty trending videos on the home page. Further, E-share application provides seamless mirroring directly from a smart-phone, bringing uninterrupted experience. The TV comes pre-installed with a host of applications, such as Hotstar, YouTube, Netflix and others.

Wireless earbuds

Featuring powerful sound and longer play time

Gizmore has launched Gizbuds, a pair of functional wireless earbuds having a battery capacity of 85mAh each. The wireless earbuds boast a range up to ten metres and support Bluetooth 5.0. Each earbud is equipped with an independent microphone, which allows the consumer to use a single bud for listening and talking at the same time.

Gizbuds are designed to let the listener have a hassle-free experience with a frequency response of 20Hz-20kHz. With a driver unit of 5.8mm diaphragm and a closed acoustic architecture, the earbuds have a sensitivity of 91dB SPL/1mW. These come with a compact 500mAh charging case that takes just a couple of hours to fully charge the earbuds using a micro-USB charging cable. A USB charging dock along with the compact case enables the user to charge a single Gizbud independently, too.

LED batten

Rechargeable light ideal for summer power cuts

SYSKA LED has introduced Syska Splendent, a rechargeable LED batten. Syska Splendent is an emergency LED batten designed to solve the problems of power cut during summers and provide light even when there is no power. It is a rechargeable batten that comes with light mode selection. The product is portable as it is light in weight and has a charging indicator. The rechargeable batten provides uniform dispersion of light and in-built cell protection.
