

Multi-purpose tracker

Tracking the belongings made easy

Portronics has unveiled iTrack 1, a two-way anti-lost-cum-key-finder. iTrack 1 is a multi-purpose device that offers two-way anti-lost, key-finder and remote-camera shutter functions.

One just needs to pair Trackfast app—available on Play Store and App Store—for it to work. After pairing with the smartphone, physically attach iTrack 1 to such valuables as wallet, keychain or handbag, which need to be tracked. If the valuable is misplaced, open Trackfast app on the paired smartphone and the device will start transmitting an audio signal. If iTrack 1 and the smartphone are separated by more than ten metres, both will start buzzing, until they are brought in range.

Fitness band

For new-age lifestyles

AQ-FIT unveils a new fitness band, M2. Some of its essential features are:

- Resists immersion up to one metre for thirty minutes
- Monitors blood pressure, SpO2h and heart rate with sensing technology
- Monitors sleep
- Has a pedometer with maps and smart reminders
- Is waterproof
- Comes with smart app to monitor health without missing any social media updates
- Features anti-lost technology

Bluetooth speaker

Ideal for both indoor and outdoor parties

Pebble has announced BassX series, the first being BassX Extreme Bluetooth speaker. Pebble BassX is designed like a handy bag, with a durable IPX4 waterproof casing. Whether the user is listening to music indoors or outdoors, entertainment remains unadulterated even on a rainy day or at a poolside party. Pebble BassX has a rubbery material surrounding the speaker enclosure, along with a grip handle at the top for easy portability.

With no tangled wires, Pebble BassX speaker brings 360 surround sound experience. Delivering not just sound, radiators for high-quality sound are loud enough

for any party. Sound quality at 10W rms is crystal clear and pure, with crisp highs, detailed midranges, earth-shattering bass and plenty of depth. Bass from the speaker sounds full, rich and deep, and brings punchy beats that hit hard and tight without sounding bloated or muddying into the midrange frequencies.

It also comes with a 2200mAh power battery that has enough power to deliver up to six hours of continuous music playtime on a single charge. Pebble BassX is equipped with an inbuilt microphone, which allows calls while connected to the speaker without interruption.
